CIVIL ENGINEERING COLLEGE, SIBPUR

AGRICULTURAL DEPARTMENT.

HIGHER AGRICULTURAL CLASS.

SESSION, 1902-1903

RULES FOR ADMISSION

FOR admission to the Higher Agricultural Class, an applicant must have one of the following qualifications —

(i) He must have passed the F E examination of the Calcutta University, and be under 23 years of age, but no student will be allowed to join the Agricultural Class after the expiration of five years from admission into the Engineering College

(ii) He must have passed the B A examination of the Calcutta University by the B course, or possess other sufficient educational qualifications, be under 23 years of age, and, in addition, have received a nomination from the Bengal Government

(iii) He must have had a general education qualifying him to follow the instruction in the Higher Agricultural Class, and must also receive a nomination from Government for admission as a special student To be eligible for a nomination under this rule, a candidate must either have landed property of his own, or be recommended by some influential landholder who desires to train him to take part in the management of his estate, or he must otherwise satisfy Government that he intends to make practical use of his agricultural training. Students entering under this rule will be termed Special Agricultural Students They will not be subject to any maximum limit of age, but will not be entitled to the privileges conferred on passed students under rules 12 and 13, even though they should obtain fully-signed diplomas in due course after passing the necessary examinations.

Every candidate for admission to this Department must apply in writing to the Principal not later than the 11th July. The form of application for a nomination, which must be addressed to the Principal, is given in Appendix B In the event of the form not being properly filled up and accompanied by the necessary certificates, no notice will be taken of the application

The number to be nominated will depend on the accommodation available

Every applicant, not already a student of the College, must undergo a medical examination by the College Surgeon before admission to this Department. If this officer's report is unsatisfactory, the applicant will not be admitted.

COURSE OF INSTRUCTION

The course of instruction in the Higher Agricultural Class will extend over two academic years.

SCHOLARSHIPS

Senior scholarships awarded in the Engineer Department are tenable in the Agricultural Department

One graduate scholarship of Rs 30 a month, tenable for one year, will be awarded on the result of the examination held at the end of the first academic year.

APPOINTMENTS.

Two appointments annually are assigned to students holding a fully-signed diploma, one in the Provincial Executive Service and one in the Subordinate Executive Service. The right of selection for these appointments will rest with Government, and the students who gained the highest marks at the examination for diplomas will not necessarily be selected.

Other holders of fully-signed agricultural diploma who wish to compete at the examination for admission to the Provincial, Subordinate Executive, and Opium Services may submit their names through the Principal to Government for nominations These applications for nominations will be considered, provided the applicants appear to His Honour the Lieutenant-Governor to be otherwise suitable for admission to these services

ENTRANCE AND TUITION FEES.

Each student in the Higher Agricultural Department will be required to pay an admission fee of Rs 10, except such students as may wish to join after passing this year's F. E. examination

For the present no tuition fees will be charged to students in the Agricultural Department, except in the case of those joining as special students under rule 3 (iii) The tuition fees for these students will be Rs 8 a month

Further particulars may be obtained free on application to the Principal.

SIBPUR,
The 14th June 1902.

B HEATON,
Offg. Principal, Civil Engineering College

CHITTAGONG DIVISION.

Rules for the admission of Private Students to the University Examinations of 1903.

I.—ENTRANCE EXAMINATION

1. A student who does not appear from any school, or who has been transferred since the 1st of September next preceding the examination, without the consent of an Inspector of Schools, to the school from which he appears, will be treated as a private student.

2. The term "private student" includes school-masters

3. Private students are required to attend the test examination of one of the undermentioned high schools, on dates to be fixed by the Head-masters.—

(1) Comilla Zilla School
(2) Brahmanbaria Annada High School.
(3) Chandpur High School.
(4) Noakhali Zilla School.
(5) Feni High School.
(6) Chittagong Collegiate School (with the Principal's permission).
(7) Chittagong Madrasa.
(8) Chittagong Municipal High School
(9) Rangamati Government High English School.

4. Applications for permission to appear at the test examination should be made to the Inspector of Schools, and they must reach his office on or before the 15th November 1902

5. Every private candidate shall state in his application whether he is an ordinary private candidate or a school-master, his age, residence and father's name, the school at which he desires to appear for the test examination and his postal address, which should be written legibly and distinctly, so that no mistake may be likely to occur

6. A private candidate who is not a school-master should file with his application the Transfer Certificate (in original) granted him from the school in which he last studied, or, if he failed at a previous Entrance Examination and did not join a school afterwards, the Registrar's receipt (in original) for the fee paid; or he will furnish satisfactory proof that he has not failed at the test examination of any entrance school in the current session, and that he is of good moral character

7. A school-master will have to file with his application a certificate from the Secretary or Proprietor of the school in which he is serving to the effect that he has been a *bona fide* paid teacher of the school since the 2nd June 1902. In case he has served in more than one school, he must produce certificates from the several schools of his having been a *bona fide* paid teacher all along since the 2nd June 1902

8. If this office is satisfied that the necessary conditions have been fulfilled, the permission asked for will be granted and sent to the applicant, who must produce it before the Head-master of the school at which he desires to appear for the test examination

9. A private candidate should be identified to the satisfaction of the officer conducting the test examination

10. Each private student will pay a fee of Rs 2 to the Head-master of the school at which he appears for the test examination. The fee is intended to meet the cost of the examination and charges for postage, &c.

11. The Head-master of each of the abovenamed schools is requested to direct the private candidates who may pass at the test examination from his school to appear before him on a fixed date, which should not be later then the 2nd January, and cause them to fill in the forms of application for admission to the Entrance Examination in his presence. He will then sign the certificates appended to the applications, and forward them to this office (in a registered cover, if sent by post) for countersignature. Under no circumstances should the entrance fee be sent to this office

12. After countersignature the applications will be sent by the Inspector direct to the candidates, who must make their own arrangements for the transmission of their applications and fees to the Registrar of the Calcutta University, so as to be received at his office on or before the 22nd January 1903

13. The Entrance Examination will be held on the 2nd March 1903 and following days

II.—F A AND B A. EXAMINATIONS

1. Deputy Inspectors of Schools, Sub-Inspectors of Schools and *bona fide* masters of English schools, who have served as such for the full period of two academical years after passing the Entrance, will be admitted to the F.A examination, and those who have served for the same period after passing the F.A will be admitted to the B A. Examination Candidates who have failed in the F A or B A examination may be admitted to the same examination if they have served for a term of six months since the date of the last examination

2. By *bona fide* masters of English schools are to be understood teachers who hold regularly paid appointments in recognised English schools teaching at least the Middle English course

3. All applications from school-masters to the Inspector for permission to appear at the F A or B A. examination should be accompanied by certificates of length of service (with dates) from the Secretaries of the schools in which they are employed, and should reach this office not later than the 5th January 1903.

4 The application of a school-master for admission to the F A or B A. examination should be signed by him in the presence of the Secretary or a member of the Managing Committee of the school in which he is employed It should then be forwarded to the Inspector for his signature, accompanied by (1) a certificate from the Secretary or a member of the Managing Committee to the effect that it has been signed by the candidate in his presence, (2) the University certificate of the candidate in proof of his having passed the Entrance or F A examination, as the case may be, and (3) the Registrar's receipt to prove, if this be the case, that the candidate has appeared at the examination of any previous year. The B A candidates should also send in their Entrance pass certificates.

5 After signature by the Inspector, the application, together with the documents that accompanied it, will be returned to the candidate, who will have to send the application and the examination fee to the Registrar of the Calcutta University, so as to reach his office on or before the 2nd February 1903

6 The F A and B A. Examinations will be held on the 16th March 1903 and following days.

CALCUTTA,
The 5th June 1902.

B. L CHANDRA,
Registrar of Calcutta

THE COMMISSIONERS FOR THE PORT OF CALCUTTA.

THE following revised scale of charges on wheat, seeds, gram, dhal, peas and lentils shipped at the Docks having been approved by the Local Government, is now published for general information in accordance with section 107 of Act III of 1890, and will come into force on and from the date of this notice.

By order of the Commissioners,

R. A. DONNITHORNE,

Secretary.

PORT COMMISSIONERS' OFFICE,
Calcutta, the 1st July 1902.

REVISED RATES FOR THE SHIPMENT, STORAGE, &c., OF WHEAT, SEEDS, GRAM, DHAL, PEAS AND LENTILS AT THE DOCKS.

Shipment Sheds.

A charge of 6 annas per ton will be made on wheat, seeds, gram, dhal, peas and lentils shipped from the quays Such charge will include receiving the goods from railway wagons, flats, boats or carts and stacking them in the sheds prior to shipment It will also include the Port Trust Railway freight on consignments delivered into the Commissioners' wagons at any of the town stations on the Port Trust Railway for shipment at the Docks.

2. The same rate of 6 annas per ton will be charged on consignments put into boats or flats for shipment in the stream

3. A removal charge of 4 annas per ton will be made for removal of consignments from one shed to another, or from the Docks for shipment at the Jetties.

4 A charge of 2 annas per ton will be made when goods originally declared for one vessel are redeclared for another or have been shut out from a vessel.

5 Rent will be charged at the rate of 2 annas per ton per week or part of a week—

(a) On goods received in a shipment shed before it is open for the receipt of exports for the vessel by which the goods are to be shipped Such rent shall cease to accrue as soon as the shed is declared to be open for the receipt of exports by such vessel.

(b) On goods shut out if a fresh dock challan is not submitted by the fourth day following that on which the vessel completed loading.

NOTE.—When cargo shut out by one steamer is shipped in another steamer of the same line and through the same shed within seven days from midnight of the date on which the vessel shutting out the cargo completed loading, the charge under clause 4 is waived, provided the shipping papers are submitted by the fourth day following that on which the vessel completed loading, failing which, paragraphs 1 and 5 apply

Kantapukur Sheds.

6 On consignments unloaded in the Kantapukur Sheds the following extra charges will be made.—

(a) Rent at the rate of 2 annas per ton per week or part of a week.

(b) Removal charge at 4 annas per ton for removal of consignment from one shed to another, or to the shipment sheds.

7. Shed accommodation at Kantapukur will also be rented out at the rate of Rs 25 for per 1,000 square feet per mensem on the condition that the Commissioners after delivering consignments into the shed shall have no further responsibility in regard to them until such time as they are redelivered to the Commissioners into wagons. The Commissioners will unload into the shed and reload into wagons.

SPECIAL NOTICE.

1. Consignors are specially advised that full wagon loads can be booked direct from up-country (a) to a shipper or (b) to a shipment shed provided the vessel's name be previously declared Full particulars in all such cases must be given in the railway receipts, invoices and wagon labels.

2 If a shipment shed be not specified, the goods will be unloaded in the general receiving sheds at Kantapukur Consignments rejected by shippers may on the order of the owner be reloaded and conveyed by rail to Hatkhollah or Pathuriaghatta at 6 annas per ton, the loading at the Dock being done by the Port Commissioners and the unloading at Hatkhollah or Pathuriaghatta by the consignees.

3. Consignors are further advised that consignees who are not also shippers will be allowed the same free time for taking delivery as at Howrah, and that demurrage will be charged as follows, counting from midnight of the day on which the goods become available for delivery:—

For the first 48 hours no charge, and for each subsequent 24 hours or part thereof, 1 pie per maund or part of a maund.

4. Shippers will be charged rent at the rate of 2 annas per ton per week or part of a week, but any unexpired free time allowed to consignees, whose goods have been taken over by them for shipment, will be added to the first week for which the charge of 2 annas is levied.

B. G.

THE COMMISSIONERS FOR THE PORT OF CALCUTTA.

NOTICE.

THE following revised scale of charges on goods landed at the Jetties and Docks, having been approved by His Honour the Lieutenant-Governor of Bengal, is now published for general information, in accordance with the provisions of section 107, Act III (B.C) of 1890, and will come into force from the third day of July 1902.

By order of the Commissioners,

R. A. DONNITHORNE,

The 1st July 1902. *Secretary.*

RESOLUTION ON THE REPORT ON COLONIAL EMIGRATION FOR THE YEAR 1901

GENERAL DEPARTMENT—EMIGRATION

Calcutta, the 24th June 1902

RESOLUTION—No 2095

READ—

The Annual Report on Emigration from the Port of Calcutta to British and Foreign Colonies for the year 1901.

THE Report for the year 1901 is confined within the limits fixed by Government last year.

Requisition and despatch of labour.

2. The number of agencies recruiting emigrants for British Colonies was one less than last year, as no labour was needed for Jamaica. The agency for the Dutch Colony of Surinam, which despatched no labourers last year, despatched 643 emigrants during the year under review. There was again an increase both in the total demand and supply of labour for the Colonies; and Demerara, as in the previous year, requisitioned and received the largest number of emigrants.

3. As in former years, though not so markedly, the greater number of the emigrants were recruited in the United Provinces of Agra and Oudh (over 63 per cent. of the whole number), but a considerable number were also recruited in the Central Provinces and in Bengal and Bihar, and a few (313, or 1·76 per cent.) were recruited in the Punjab.

Depots

4. Of 17,771 emigrants located in the sub-depôts, 15,142 actually arrived in the Calcutta depôts, and after adding to this number emigrants recruited in the preceding year, readmissions from hospitals after recovery and infants born during the year, 15,973 emigrants were accommodated in the depôts in Calcutta during the year, as compared with 15,465 in the preceding year

The casualties in the depôts by death and desertion were fewer than in the preceding year, but rejections for unfitness increased in number, and the sufficiency of the medical examination in the mufassal came under discussion during the year. The Lieutenant-Governor notices with satisfaction the generally satisfactory report regarding the sanitary condition of the depôts. There was, however, a noticeable prevalence of cerebro-spinal fever; the disease was believed by the Medical Inspector to have been brought into the depôts by intending emigrants and did not originate in the depôts.

Embarkation of emigrants

5. The emigrants who embarked for the Colonies numbered 11,951, or 277 more than in the preceding year. Of these, 495 were returned emigrants who re-engaged. There was a marked increase in the number of steam-vessels employed in emigration work as compared with sailing ships during the year.

Returned emigrants, and remittances of immigrants in the Colonies

6. During the year 3,708 emigrants left the Colonies for India, with aggregate savings of Rs. 6,14,176-9-6, or an average each with Rs. 165-10-2. Demerara returned the largest number of emigrants, viz., 1,723. The Indian immigrants in Natal who are about 66,000 in number remitted to India during the year nearly 12½ lakhs of rupees by money-order, and have again far exceeded the immigrants of other Colonies both in the number and value of their remittances to India. The increase in Natal has been steady and marked for the last four years, rising from Rs. 5-6-8 for each resident immigrant in 1898 to Rs. 18-10-11 in 1901. It would appear that the Indian immigrant in Natal is more prosperous than his fellow-countryman in the other Colonies, but it may be that the increased remittances were a temporary result of the war. The Colonies rank as follows in the order of the value of the average remittances made—Natal, Fiji, Mauritius, Trinidad, St. Lucia, Demerara, and Jamaica.

7. The thanks of the Lieutenant-Governor are due to Dr. Banks for his administration of the Department.

By order of the Lieutenant-Governor of Bengal,

W. C. MACPHERSON,

Offg. Secretary to the Government of Bengal.

ANNUAL ADMINISTRATION REPORT OF THE METEOROLOGICAL DEPARTMENT FOR 1901-1902.

THE following report is published for general information.

W. C. MACPHERSON,
Offg. Secy. to the Govt. of Bengal.

DARJEELING,
The 28th June 1902.

THE Bengal Meteorological Department was under my charge throughout the past year.

2. On the 31st March 1902 the number of observatories under my direct control was 46, *i.e.*, the same number as on the corresponding date last year. The classification of observatories continued to be the same as in the previous year, there being six second-class, 39 third-class and one voluntary observatory. The second-class observatories record observations at 8, 10 and 16 hours daily and those of the third-class one set of observations only, at 8 A.M. The voluntary observatory at Cooch Behar also records one set of observations, at 8 A.M.

3. The following table gives the names and distribution of these 46 observatories:—

Second-class Observatories

Chittagong	Darjeeling	Hazaribagh
Darbhanga	False Point.	Saugor Island.

Third-class Observatories.

Arrah.	Daltonganj	Narayanganj.
Balasore.	Dehri.	Naya Dumka.
Bankura.	Dinajpur	Noakhali.
Barisal.	Faridpur.	Pamban (in Madras).
Berhampore.	Gaya.	Patna.
Bhagalpur	Jalpaiguri.	Puri.
Bogra.	Jessore.	Purnea.
Burdwan.	Krishnagar.	Purulia.
Buxar.	Malda.	Rampur Boalia.
Chaibassa.	Midnapore.	Ranchi.
Chapra.	Motihari.	Raniganj.
Comilla.	Muzaffarpur.	Rangpur.
Cuttack.	Mymensingh.	Sirajganj.

Voluntary Observatory.

Cooch Behar.

4. There has been no change in the system of observation, except that the record of pressure and temperature by automatic instruments was introduced at Burdwan observatory from the 13th April 1901.

5. *Inspection of Observatories.*—The following table shows the observatories that were inspected during the past year and the dates of inspection. Altogether 24 visits of inspection were made, viz., one by Mr. Eliot, Meteorological Reporter to the Government of India and Director-General of Indian Observatories, seven by myself, one by Mr. C. Gaetane Sub-Inspector of Observatories attached to the Meteorological Office, Government of India, and 15 by Babu Jati Lal De, my head clerk.

6. *Results of Inspection and Work at Observatories—Second-class Observatories.*—*Darjeeling* was inspected by Mr Eliot, but no report on the condition of the observatory has been received The observations received from Darjeeling have been accurate and trustworthy. *Darbhanga* observatory was in good condition at the time of my visit and the observations received have been satisfactory throughout the year. Of the remaining 4 observatories which could not be inspected during the past year, *Hazaribagh* continued to submit accurate observations, and those received from *Saugor Island*, *Chittagong* and *False Point* were generally correct.

7. *Third-class Observatories.*—The observatories at *Berhampore*, *Bhagalpore*, *Bogra*, *Burdwan*, *Chapra*, *Jessore*, *Krishnagar*, *Narayanganj*, *Noakhali*, *Patna*, and *Purnea* were found to be in good condition at the time of inspection and the observations recorded by the observers at these stations have been satisfactory throughout the year. *Barisal*, *Comilla*, *Dumka*, *Rampur Boalia*, and *Sirajganj* at the time of inspection were found to be in good condition. The observations submitted from the first three have been accurate, except during short periods, while temporary observers were in charge. The reports received from the last two were not so carefully prepared. *Faridpur* was visited twice and on both occasions the observatory was found to be in an unsatisfactory condition. When I visited the observatory in January 1902, I found the observer suffering from nervous debility and unfit for work. It was thought necessary to relieve him of his duties and at the suggestion of the District Engineer, who is the

Superintendent of the observatory, the 3rd teacher of the local zilla school was appointed as observer with effect from 27th January. The old observer has since submitted an application to retire on pension, on medical certificate. From 27th January the observations have been correct and reliable. *Motihari, Muzaffarpur*, and *Mymensingh*, when inspected, were found to be in bad condition. The Mymensingh observer was fined Rs. 2, and those at Motihari and Muzaffarpur were warned to be more careful in future.

8. The observers at the remaining stations, more especially those at *Buxar, Cuttack, Dinajpur, Ranchi* and *Raniqunge*, that could not be visited during the year generally did good work. There has been no improvement in the case of *Pamban* and *Rangpur*, where the observers are less careful than they might be.

9. *Voluntary Observatory.—Cooch Behar* is the only observatory of this class in Bengal. It could not be visited, but the observations received have been accurate throughout the year.

10. It was found necessary, during the year under review, to remove the thermometer shed at Darjeeling from the site it occupied, as it was found that changes were being made in the garden of the Rector of St. Paul's School which were of such a character as to render the observations unreliable. A site was selected by the observer and observations there were commenced on the 12th April 1902.

11. I intended to visit Malda to settle the question of removing the wind instruments from the roof of the Circuit House, where they are sheltered by trees roundabout, as stated in paragraph 15 of my last Administration Report. But this could not be arranged for, as the funds for this purpose, at the disposal of the Meteorological Reporter to the Government of India, were exhausted. I hope to visit Malda in the next cold weather.

12. Owing to the construction of the new Judges' Court building at Mymensingh, the exposure of the rain-gauge at that station was affected, and by arrangement with the Magistrate it was removed to a better site.

13. The following observers were granted special awards by the Meteorological Reporter to the Government of India and Director-General of Indian Observatories for storm observations, &c., taken by them during the past year:—

STATION.	Amount
	Rs.
Burdwan	3
Jessore	1
Rampur-Boalia	1
Saugor Island	2
Pamban ...	5

14. *Work at and Inspection of Rain-gauge Stations.*—The number of rain-gauge stations on the 31st March 1902, was 366, *i.e.*, 4 more than on the corresponding date last year. Five stations, viz., Amta in Howrah district, Atwari, Birganj, and Parbatipur in Dinajpur, and Saidpur in Rangpur, were started, and 1 station, viz, Subarnakhali, was closed during the year. (The rainfall work at Subarnakhali has been in abeyance during the whole of the past year, there being no suitable site for the rain-gauge. This station has, therefore, been stated as "closed" for the present.)

15. 300 visits of inspection were made against 301 during 1900-1901. The total number of rain-gauges inspected was 177 against 194 in the previous year. The reports received from the inspecting officers showed that the rain-gauges were for the most part in good condition and the rainfall registers properly kept.

16. The following table shows the distribution of the 366 rainfall-stations in the various districts in Bengal, as it stood on 31st March 1902 and the number of stations inspected in each district during the past year:—

17. The system of supplying rain-gauges and measure glasses to the rain-registering officers in Bengal from the Meteorological Office, Bengal, by an arrangement mentioned in paragraph 17 of my Administration Report for 1899-1900, worked satisfactorily.

18. *Departmental Reports.*—The short annual report on the meteorology of Bengal for the year 1901, with two maps illustrating the actual and percentage rainfall was prepared before the close of the past official year. (It was submitted to the Government of Bengal on 24th April 1902.)

19 The report on the meteorology of Bengal for the monsoon season of 1901 was prepared and submitted to the Government of Bengal on the 23rd January 1902. The usual number of rainfall maps illustrating the distribution of rainfall over the province, the district variation from the normal and the percentage variation from the normal for the monsoon period of 1901, were also prepared and submitted to Government with the monsoon summary.

20. The monthly rainfall table for Bengal and the meteorological table for Bengal and Assam, with a summary of the chief features of the weather of the month, was published in the *Calcutta Gazette* about the middle of every month.

21. The following annual rainfall tables were prepared and published in the *Calcutta Gazette.*

Table I—Showing the monthly and annual rainfall at 366 stations in Bengal for 1901.

Table II—Showing the monthly and annual average rainfall at 254 rainfall stations in Bengal.

Table III—Comparison table of the rainfall of 1901 at 254 rainfall stations in Bengal with averages of previous years.

Addenda to the rainfall table of the Province of Bengal for the year 1901.

22. A set of three charts showing the distribution of actual rainfall, the variation from the normal and the percentage variation was prepared and submitted monthly to the Government of Bengal and furnished to the Sanitary Commissioner for Bengal during the period May to October 1901.

23. The Bay of Bengal and Bengal daily weather report dealing with observations taken at 68 meteorological observatories, viz., 46 observatories

under my direct control and 22 other stations in Assam, Burma, Madras and Ceylon, including the first-class observatory at Alipore, which is under the administration of the Meteorological Reporter to the Government of India and Director-General of Indian Observatories, was published from 1st May to 31st October. The increase is due to the addition of Tezpur and Dibrugarh to the number of reporting stations. The information of wind velocity at 8 A.M. was considered valuable by the Port authorities, and at the suggestion of the Deputy Port Conservator of Calcutta, and with the sanction of the Meteorological Reporter to the Government of India and Director-General of Indian Observatories and of the Government of Bengal, a column giving this additional information has been added to the report. The Bay of Bengal report was published during the rest of the year.

24. The daily flag signal message to Saugor Island and Elephant Point (Rangoon) and the daily weather telegram to the following officers were continued throughout the year:—

Port Officer, Akyab.
Ditto, Moulmein.
Ditto, Rangoon.
Ditto, Negapatam.
Ditto, Coconada.
Vice-Chairman, Port Commissioners, Rangoon.
Deputy Port Conservator, Madras.
Port Conservator, Cuddalore.
Ditto, Porto Novo.

25. The daily weather telegram was sent to the Port Officer, Chittagong, from 16th May to 16th November (inclusive). The telegram was also sent to the Port Conservator, Calingapatam, regularly on Fridays, Saturdays and Sundays

26. Warnings of expected heavy rainfall were sent to—

The Superintending Engineer, Orissa Circle.
Ditto, Sone Circle.
Ditto, South-Western Circle.
The Executive Engineer, Cossye Division.
Ditto, Balasore Division.
Ditto, Akhoyapada-Jajpur Division.
Ditto, Arrah Division.
Ditto, Buxar Division.
Ditto, Eastern Sone Division.
The Proof Officer, Balasore
The Superintendent of Telegraphs, Madras Division.
Ditto, Bengal Division.
The Traffic Superintendent, East Coast Railway.
The Engineer-in-Chief, East Coast Railway.
The Chief Engineer for Irrigation, Madras.

27. Information of the occurrence of rainfall above one inch at Daltonganj was sent to the Sub-Engineer, Delhi Workshops.

28. There was no addition or alteration in the code of storm signals.

29. The dates of the principal storms and barometric depressions occurring during the past year are given in the first of the two following tables, and the action taken in the matter of issuing storm warnings and hoisting storm signals is indicated in the second of these tables.

Table giving a brief statement of the storms which affected the Bay of Bengal coasts during the year 1901-1902

Number of storm	Period of depression or storm.	Character of storm	Coast affected.
1	May 23rd to 25th	Feeble cyclonic storm formed in the south-east of the Bay on the 22nd of May, when there was a diffused depression over the south of the Bay with indraught towards it from both the Madras and Burma coasts It moved northwards during the three subsequent days, but as it approached the north of the Bay, it became diffused and practically ceased to exist as a cyclonic disturbance	Burma and Arakan coasts.

Number of storm	Period of depression or storm	Character of storm	Coast affected
2	July 25th to 28th	Shallow depression which formed in the north-west of the Bay On the 25th of July it was off the coast of the Circars, but on the 26th and 27th was more to the north, and ultimately passed inland across the Orissa coast on the 28th	Orissa and Bengal coasts.
3	September 19th to 22nd	Barometric depression which began about the 17th of September in the south-east of the Bay and in that region was a storm of some severity, but as it moved westward towards the Circars, it became diffused. Moving into the Central Provinces, it turned northwards and broke up on reaching the Himalayas about the 26th	Bengal, Orissa and Circars coasts.
4	October 14th	Barometric depression of small extent and of considerable depth which began to develop over the north of the Bay It moved in a south westerly direction, and struck the coast of the Circars on the 14th of October Stormy weather was experienced on the coast between Gopalpur and Masulipatam for about 24 hours	Circars coast
5	November 14th to 18th...	Barometric depression which was near the coast on the 14th of November, the centre being east from Cocanada On the 15th the centre was near Vizagapatam and on the following day near Gopalpur At that time the depression was recurving and after causing very heavy rain to the north of the centre, filled up somewhat, and in its subsequent course over the north of the Bay, towards Chittagong, it caused no great increase in wind velocity On the 19th all trace of the disturbance had disappeared	Bengal, Orissa and Circars coasts.
6	November 24th to 26th	Cyclonic storm which began to form near the Andaman Islands about the 22nd of November when there was a diffused depression extending over the centre and south of the Bay Within this depression there appeared to be two centres of disturbance, one of which tended westward towards the Madras coast More to the north-east, the second disturbance at first moved slowly north-westward and when it approached the Orissa coast on the morning of the 26th, it was of considerably more than average severity Passing between Balasore and Saugor Island and between Midnapore and Calcutta, the depression turned more to the east and soon afterwards filled up	Ditto
7	December 6th to 9th ...	Barometric depression which developed in the south-east of the Bay about the 6th of December and advancing towards the Madras coast, caused very stormy weather with heavy rainfall on a part of the coast near Madras. The depression passed rapidly westward across the south of the Peninsula about the 9th	Coromandel coast.

RESOLUTION ON THE REPORT OF THE SANITARY COMMISSIONER, BENGAL, FOR THE YEAR 1901.

MUNICIPAL DEPARTMENT—SANITATION

Darjeeling, the 26th June 1902

RESOLUTION—No. 1191—M

READ—

The Report of the Sanitary Commissioner, Bengal, for the year 1901.

Read again—

The Sanitary Commissioner's Report for 1900 and the Resolution of Government recorded on it

The report of the Sanitary Commissioner for 1901 has been submitted punctually, and is prepared on the same lines as last year. Some of the tables, which were in the report for 1900, have been omitted, but there are still more than are required, about which separate orders will be given. It is the duty of the Sanitary Department not only to record facts as to outbreaks of epidemic and other diseases, but to inquire into their causes and to report on local conditions affecting health. The space made available by the omission of these tables could be profitably utilised in discussing the insanitary conditions of particular localities, in recording what has been done or attempted towards the introduction of preventive measures or in explaining why this is not possible. For instance, it is noted in paragraph 32 that the very high rate of mortality from small pox in Cuttack is due to preventible causes. If this is so, the necessary measures for checking the disease might have been indicated. It is possible that the Sanitary Department is taking steps for this object, but there is no mention of this in the report.

2. *Vital Statistics.*—The rainfall of the year was scanty and unevenly distributed, and the agricultural outturn below the average in many districts. These conditions are to some extent reflected in the vital statistics, and the death rate, though lower by 3·94 per mille than that of the year 1900, was higher by ·19 per mille than the average death-rate of the last five years, which is calculated on the census of 1891. On the other hand, the birth-rate has improved. It was 1·63 per mille higher than in 1900, calculated on the revised figures of population, and 1·77 per mille higher than the average of the last five years calculated on the figures of 1891. The census of 1901 has shown an increase of 5·1 per cent in the population, and it appears that, in spite of famine and plague in the interval, the general health of the Province is not deteriorating.

The value of vital statistics depends upon the accuracy with which they are collected. The statistics of the past year were tested over a considerable area by the vaccination staff, who discovered that 3,867 births and 2,240 deaths had not been reported. This amounts to a percentage of 1·2 of births and ·98 of deaths for the area tested, and shows that the reporting staff do their work fairly well. The Magistrates of the districts mentioned in paragraph 7 of the report, where reporting was most defective, should take measures to improve this work.

3. *Principal diseases.*—The decrease in the general death-rate was due mainly to the comparative absence of cholera. In Orissa there was a severe outbreak, which is attributed to the short rainfall of 1901. This explanation is doubtful. It would appear that want of sanitary precautions in regard to the pilgrims and at local fairs was more responsible for the outbreak, and it is mentioned that the local authorities at Puri neglected to make proper arrangements at a local fair where the disease originated. It is also said that the District Board has disclaimed responsibility in the matter. The duties of District Boards to provide for the drainage, water-supply, and

conservancy staff at fairs were laid down in the Government Resolution of the 29th September 1891, and again in a circular of the 12th July 1893, and a report will be called for to explain why the rules there prescribed were not followed in Puri.

The number of anti-cholera inoculations was smaller than in 1900, owing to the smaller emigration. The results, however, so far as recorded, were satisfactory, as of the coolies exposed to the disease, 8·36 per cent. of uninoculated persons were affected, of whom 50 per cent. died, while of inoculated coolies, only 1 2 per cent. took the disease and none died. A larger number of persons of the non-emigrant class were inoculated than in 1900, and the work done reflects credit on the Assistant Surgeons who were employed.

4. There was a severe outbreak of small-pox during the year, and the mortality was higher than in any year since 1877. The subject will be dealt with more fully in the Vaccination Report, and it is only necessary to remark here that in Orissa, where the disease was most prevalent, it is said to be due largely to preventible causes, of which inoculation is the chief. The mortality from this cause among children was considerably smaller than in 1900 and 25 per cent. less than in 1899, but no explanation is suggested.

5. In accordance with the instructions of the Government of India, the returns under the head of plague have been separately classified. The number of attacks and deaths for the whole Province were 90,762 and 78,629, respectively, against 40,294 and 38,412 in the preceding year. The fall in the ratio of mortality from 95·74 to 86 63 indicates an improvement in registration, but the percentage is still higher than that which the experience of plague elsewhere has shown to constitute a normal rate. It is noticeable that the percentage of deaths to attacks in Calcutta was as high as 91·54, against 86·11 in the interior. The reason for this should be investigated. It is possibly due to the greater facilities for evacuation of houses in rural areas. The people in rural areas now understand the value of evacuation of infected houses and readily resort to it; and it is to be hoped that the advantages of disinfection will in time be similarly appreciated. It appears that disinfection was satisfactorily carried out in several large towns in Bihar, and Assistant Surgeons and others have been trained in this important work. Anti-plague inoculation was carried out on a considerable scale in Gaya and Patna, but the information as to results is unfortunately incomplete. The experiments of Major Drury and Captain Rogers, mentioned in paragraph 40, have been separately considered. The results are not in agreement with those obtained elsewhere, and the experiments are to be further tested. The Lieutenant-Governor, while unable on the experience gained in Bengal to accept the arguments of Major Dyson in favour of inoculation against disinfection, is far from wishing to discourage inoculation when it can be voluntarily carried out. That personal influence can achieve excellent results in this direction is shown in the case of Gaya, where 22,169 persons were inoculated during the year and only 418 deaths from plague occurred.

6. The portion of the report devoted to fever is not very interesting. It shows that the death-rate was a little higher than the average of the last ten years, though this may be accounted for by the inclusion of deaths from plague. There is nothing to indicate that any inquiries were made to show how far this was the case. The Lieutenant-Governor hopes that more information will be given, as promised, in future reports as to the comparative immunity from fever of particular areas, and that the causes of the severe outbreaks in particular localities, of which a long list is given in paragraph 46, will be more fully investigated. With regard to the type of fever prevailing, some information is given, but it is far from complete, and more scientific and exhaustive investigations are necessary to deal with the subject. Materials will, it is hoped, be shortly available in the Medical Histories of Districts which are under preparation in the Medical Department.

7. The deaths from dysentery and diarrhœa were fewer than in the previous year, but above the average of the preceding ten years. The greatest number of deaths from these causes occurred in towns—a result probably due to defective diagnosis in rural areas. Deaths from other causes decreased owing to the separate classification of plague.

8. *Sanitary Works.*—There was a considerable increase of expenditure on conservancy, drainage, and the treatment of the sick in municipalities. The expenditure on conservancy has increased since 1895 by over three lakhs of rupees. The list of works considered by the Sanitary Board during the year shows that progress is being made for the improvement of water-supply and drainage.

By order of the Lieutenant-Governor of Bengal,

E. W. COLLIN,

Offg. Secretary to the Govt. of Bengal.

The mean pressure, temperature, etc., are deduced from the traces of the Barograph and Thermograph, and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground

o, overcast, d, drizzling rain; p, passing temporary showers.

The 7th July 1902

A PEDLER,

Director of Public Instruction, Bengal

CIVIL ENGINEERING COLLEGE, SIBPUR

AGRICULTURAL DEPARTMENT

HIGHER AGRICULTURAL CLASS.

SESSION, 1902 1903

RULES FOR ADMISSION

For admission to the Higher Agricultural Class, an applicant must have one of the following qualifications —

(i) He must have passed the F E examination of the Calcutta University, and be under 23 years of age, but no student will be allowed to join the Agricultural Class after the expiration of five years from admission into the Engineering College.

(ii) He must have passed the B A. examination of the Calcutta University by the B course, or possess other sufficient educational qualifications, be under 23 years of age, and, in addition, have received a nomination from the Bengal Government

(iii) He must have had a general education qualifying him to follow the instruction in the Higher Agricultural Class, and must also receive a nomination from Government for admission as a special student To be eligible for a nomination under this rule, a candidate must either have landed property of his own, or be recommended by some influential landholder who desires to train him to take part in the management of his estate, or he must otherwise satisfy Government that he intends to make practical use of his agricultural training. Students entering under this rule will be termed Special Agricultural Students They will not be subject to any maximum limit of age, but will not be entitled to the privileges conferred on passed students under rules 12 and 13, even though they should obtain fully-signed diplomas in due course after passing the necessary examinations.

Every candidate for admission to this Department must apply in writing to the Principal not later than the 14th July. The form of application for a nomination, which must be addressed to the Principal, is given in Appendix B In the event of the form not being properly filled up and accompanied by the necessary certificates, no notice will be taken of the application.

The number to be nominated will depend on the accommodation available

Every applicant, not already a student of the College, must undergo a medical examination by the College Surgeon before admission to this Department It this officer's report is unsatisfactory, the applicant will not be admitted.

COURSE OF INSTRUCTION

The course of instruction in the Higher Agricultural Class will extend over two academic years.

SCHOLARSHIPS

Senior scholarships awarded in the Engineer Department are tenable in the Agricultural Department

One graduate scholarship of Rs. 30 a month, tenable for one year, will be awarded on the result of the examination held at the end of the first academic year.

APPOINTMENTS.

Two appointments annually are assigned to students holding a fully-signed diploma one in the Provincial Executive Service and one in the Subordinate Executive Service The right of selection for these appointments will rest with Government, and the students who gained the highest marks at the examination for diplomas will not necessarily be selected

Other holders of fully-signed agricultural diplomas who wish to compete at the examination for admission to the Provincial, Subordinate Executive, and Opium Services may submit their names through the Principal to Government for nominations These applications for nominations will be considered, provided the applicants appear to His Honour the Lieutenant-Governor to be otherwise suitable for admission to these services

ENTRANCE AND TUITION FEES

Each student in the Higher Agricultural Department will be required to pay an admission fee of Rs 10, except such students as may wish to join after passing this year's F E examination

For the present no tuition fees will be charged to students in the Agricultural Department, except in the case of those joining as special students under rule 3 (iii) The tuition fees for these students will be Rs 8 a month

Further particulars may be obtained free on application to the Principal

SIBPUR, B HEATON,

The 14th June 1902 *Offg. Principal, Civil Engineering College*

CHITTAGONG DIVISION.

Rules for the admission of Private Students to the University Examinations of 1903.

I —ENTRANCE EXAMINATION

1 A student who does not appear from any school, or who has been transferred since the 1st of September next preceding the examination, without the consent of an Inspector of Schools, to the school from which he appears, will be treated as a private student

2 The term "private student" includes school-masters

3 Private students are required to attend the test examination of one of the undermentioned high schools, on dates to be fixed by the Head-masters —

(1) Comilla Zilla School
(2) Brahmanbaria Annada High School
(3) Chandpur High School
(4) Noakhali Zilla School.
(5) Feni High School.
(6) Chittagong Collegiate School (with the Principal's permission).
(7) Chittagong Madrasa.
(8) Chittagong Municipal High School
(9) Rangamati Government High English School.

4 Applications for permission to appear at the test examination should be made to the Inspector of Schools, and they must reach his office on or before the 15th November 1902

5 Every private candidate shall state in his application whether he is an ordinary private candidate or a school-master his age, residence and father's name, the school at which he desires to appear for the test examination and his postal address, which should be written legibly and distinctly, so that no mistake may be likely to occur

6 A private candidate who is not a school-master should file with his application the Transfer Certificate (in original) granted him from the school in which he last studied; or, if he failed at a previous Entrance Examination and did not join a school afterwards, the Registrar's receipt (in original) for the fee paid; or he will furnish satisfactory proof that he has not failed at the test examination of any entrance school in the current session, and that he is of good moral character

7 A school master will have to file with his application a certificate from the Secretary or Proprietor of the school in which he is serving to the effect that he has been a *bonâ fide* paid teacher of the school since the 2nd June 1902 In case he has served in more than one school, he must produce certificates from the several schools of his having been a *bonâ fide* paid teacher all along since the 2nd June 1902

8. If this office is satisfied that the necessary conditions have been fulfilled, the permission asked for will be granted and sent to the applicant, who must produce it before the Head-master of the school at which he desires to appear for the test examination.

9 A private candidate should be identified to the satisfaction of the officer conducting the test examination

10. Each private student will pay a fee of Rs. 2 to the Head-master of the school at which he appears for the test examination The fee is intended to meet the cost of the examination and charges for postage, &c.

11 The Head-master of each of the abovenamed schools is requested to direct the private candidates who may pass at the test examination from his school to appear before him on a fixed date, which should not be later then the 2nd January, and cause them to fill in the forms of application for admission to the Entrance Examination in his presence He will then sign the certificates appended to the applications, and forward them to this office (in a registered cover, if sent by post) for countersignature Under no circumstances should the entrance fee be sent to this office

12. After countersignature the applications will be sent by the Inspector direct to the candidates, who must make their own arrangements for the transmission of their applications and fees to the Registrar of the Calcutta University, so as to be received at his office on or before the 22nd January 1903

13. The Entrance Examination will be held on the 2nd March 1903 and following days

II—F A AND B A EXAMINATIONS

1 Deputy Inspectors of Schools, Sub-Inspectors of Schools and *bona fide* masters of English schools, who have served as such for the full period of two academical years after passing the Entrance, will be admitted to the F A examination, and those who have served for the same period after passing the F.A will be admitted to the B A Examination Candidates who have failed in the F A or B A examination may be admitted to the same examination if they have served for a term of six months since the date of the last examination

2 By *bonâ fide* masters of English schools are to be understood teachers who hold regularly paid appointments in recognised English schools teaching at least the Middle English course

3. All applications from school-masters to the Inspector for permission to appear at the F A or B A. examination should be accompanied by certificates of length of service (with dates) from the Secretaries of the schools in which they are employed, and should reach this office not later than the 5th January 1903

4 The application of a school-master for admission to the F A or B A examination should be signed by him in the presence of the Secretary or a member of the Managing Committee of the school in which he is employed It should then be forwarded to the Inspector for his signature, accompanied by (1) a certificate from the Secretary or a member of the Managing Committee to the effect that it has been signed by the candidate in his presence, (2) the University certificate of the candidate in proof of his having passed the Entrance or F A examination, as the case may be, and (3) the Registrar's receipt to prove, if this be the case, that the candidate has appeared at the examination of any previous year The B A candidates should also send in their Entrance pass certificates

5 After signature by the Inspector, the application, together with the documents that accompanied it, will be returned to the candidate, who will have to send the application and the examination fee to the Registrar of the Calcutta University, so as to reach his office on or before the 2nd February 1903

6 The F A and B A Examinations will be held on the 16th March 1903 and following days.

Notice of Lease of Waste Lands in the Sunderbans, under Rule 19, Section 11 of the Waste Lands Manual, 1898.

NOTICE is hereby given that the lease of the land specified in the Schedule hereto annexed, and of which the plan is open to inspection at the office of the Commissioner of the Sunderbans, has been applied for by Purnendu Narain Singha, and will be sold at 12 o'clock noon on the 2nd of October 1902, Thursday, at the Sunderbans Commissioner's office at Alipur, unless meantime the sale is stopped or postponed in consequence of claims or objection under Act XXIII of 1863 (to provide for the adjudication of claims to waste lands), or owing to any other cause

2 The lease of the land will be granted subject to the conditions which are specified below, as well as to the general terms annexed to the Rules for the Sale of Leases of Waste Lands in the Sunderbans of the 24-Parganas, Khulna, and Backergunge, dated 12th November 1879

Conditions

That the land shall be subject to all existing rights of way and water and other easements

That the right of using all streams and channels in any way navigable shall be reserved to the public, as also the use of a tow path not less than 25 feet in width on each side of every such stream and channel

That no charge will be made for wood and timber standing on the land at the time it is leased, nor for any wood which may be cut and burnt to effect clearances, or which may be used on the land But for wood and timber exported for sale a duty shall be levied at such rate and in such manner as may, from time to time, be prescribed by Government

REDISTRIBUTION OF THE SCALE OF TONNAGE ALLOTTED TO THE VARIOUS GRADES OF THE BENGAL PILOT SERVICE.

No. 105T.—Marine.

Government of Bengal.

MARINE DEPARTMENT.

Dated Darjeeling, the 1st July 1902.

RESOLUTION.

READ—

Resolution No. 2178Marine, dated 18th September 1893.
Letter No. 2234, dated 17th June 1902, from the Port Officer, Calcutta.

IN the Resolution read above the tonnage scale of vessels to be distributed among the various grades of pilots was fixed, the object of this scale being to reserve ships of large tonnage for the more experienced pilots, and also to secure, as far as possible, an average income to each pilot, proportionate to his standing in the service. This scale has now been in force for nearly nine years.

2. In his letter of the 17th June 1902, the Port Officer, Calcutta, brings to the notice of Government that, while the number of vessels of the Branch Pilots' tonnage has increased from 931 in 1894 to 1,771 in 1901, the numbers falling to the three lower grades have decreased. Notwithstanding this falling off in number in the lower grades, the earnings of the Master and Mate Pilots show an increase. This is entirely due to the fact that these junior officers have had to pilot over 25 per cent. of the vessels belonging to the senior class. The vessels in this class are yearly increasing, and the numbers are far in excess of the capabilities of the Branch Pilots. In order to avoid detention to vessels and to ensure a more equable distribution of their number among the members of the Pilot Service, the Lieutenant-Governor considers that the time has arrived to readjust the tonnage of the several grades. Accordingly His Honour has been pleased to decide that the following scale shall be observed until further orders:—

Branch Pilots	...	... Above	3,000 tons.
Senior Master Pilots	..	... From over	1,600 to 3,000 „
Junior ditto	...	.. „ „	1,600 to 2,600 „
Mate Pilots	..	... Up	to 1,600 „

ORDER.—Ordered that a copy of this Resolution be forwarded to the Port Officer, Calcutta, for information and guidance.

Ordered also that a copy of this Resolution be forwarded to the Government of India in the Department of Finance and Commerce for information.

By order of the Lieutenant-Governor of Bengal,

D. B. HORN,

Offg. Secretary to the Govt. of Bengal.

FIRST FORECAST OF THE JUTE CROP IN BENGAL FOR THE SEASON, 1902.

THE following is published for general information.

W. C. MACPHERSON,
Offg. Secy. to the Govt. of Bengal.

The 2nd July 1902.

DEPARTMENT OF LAND RECORDS AND AGRICULTURE, BENGAL.

First forecast of the Jute Crop in Bengal for the Season 1902.

Explanatory.—Returns are received from 26 districts in Bengal, the area under jute in the remaining 21 districts being insignificant. About two thirds of the crop is grown in Eastern Bengal, principally in Mymensingh, Tippera, Dacca, Pabna, Rajshahi and Bogra, while one-fourth comes from the Rangpur, Dinajpur and Jalpaiguri districts of Northern Bengal. The present forecast contains figures for the area sown, and the probable outturn of the crop, as estimated up to the middle of June.

2. *Character of the season.*—The season has been abnormal and we must go back to 1891 for a record of so heavy a rainfall in April and May. A prolonged drought ended in the middle of March. In April the rainfall was excessive, especially in the Dacca and Chittagong Divisions. In May the fall was almost everywhere in excess, and especially so in the Dacca Division. During these two months the rainfall almost doubled the normal in the Dacca Division and more than did so in Tippera. In South-Eastern Bengal the weather was, therefore, very unfavourable for sowings, and to a less extent this was the case also in North-Eastern Bengal. The heavy rain in May has also retarded weeding.

3. *Area cultivated.*—It is now estimated by District Officers that the normal area under jute is 2,313,200 acres, that 2,262,200 acres were grown last year; and that this season's cultivation extends to 2,107,500 acres. There can be little doubt that the area cultivated in 1901 was under-estimated. The imports into Calcutta and Chittagong indicate that the crop approached 76 lakhs of bales. At 3⅕ bales to the acre, which may be taken as a bumper crop, the area cropped must have been 2,375,000 acres, so that District Officers have underestimated the area by 5 per cent. Assuming the same co-efficient of error in this year's estimate, the area is not likely to fall short of 2,200,000 acres, which is probably 7 per cent. less than in 1901.

The decrease is mainly due to excessive rainfall at the sowing seasons, but is also attributed in some districts to low prices obtained last year.

4. *Character of the crop.*—The prospects of this season's crop are not encouraging. Of the districts which return 50,000 acres and upwards, only two, Dinajpur and the 24-Parganas, estimate a full average crop of 100 per cent. Pabna expects 93 per cent., Rajshahi 85 per cent, and Purnea 82 per cent. Jalpaiguri anticipates a 77 per cent. crop, while the important districts of Mymensingh, Rangpur, and Faridpur with 942,200 acres between them only estimate 75 per cent. Dacca, with 152,000 acres, anticipates only 57·8 per cent., while Tippera, with 235,000 acres, expects only 50 per cent. of a normal crop. The detailed estimates worked out for the Province as a whole give a 75 per cent. crop It seems to me that the returns from some districts are unduly pessimistic.

This is especially the case in North-Eastern Bengal, where the damage reported seems to be out of all proportion to the excess in rainfall over the normal. Making allowance for the tendency to underestimate, which was so strongly marked last season, I anticipate that an 80 per cent. crop will be reaped, provided that conditions for the remainder of the season are normal. If my estimates of area and outturn are correct, the yield may be expected to reach 52⅘ lakhs of bales.

5. *Stocks of the previous season's crop in hand.*—District Officers report stocks to be low.

The above estimates of area and outturn are based upon the reports from District Officers, which are published for general information with this forecast.

Rajshahi	Jalpaiguri ...	1,894,600	1,075,000	66,700	59,800	58,700	77	77	Little jute remains in the district for home consumption.	Early and frequent rains have prevented successful weeding
	Darjeeling (plains)	744,960	148,000	2,500	2,000	2,500	75	80	Little	The increase in the outturn is expected, owing to early rains

	Bogra	869,760	660,000	95,000	71,000	70,000	90	70	Very little ...	Frequent rains proved detrimental to the growth of the plants and suppressed the growth, interfering with the weeding Hence the fall in area and outturn
	Pabna	1,176,960	882,500	144,800	140,500	153,000	100	93	Little	Jute is more extensively grown in the Serajganj subdivison than in the Sadar It is reported by the Subdivisional Officer of Serajganj, that the cultivators having in stock the required quantity of food-grains have increased the area under jute to liquidate debts. Owing to excessive rainfall the weeding operations have been retarded, and the crop on the low lands has been much damaged. Hence the outturn is expected to be below the average The stock of jute may be attributed to the low price ruling during the greater part of the trading season.
Dacca	Dacca .	1,780,480	1,213,500	171,000	165,000	152,000	102	58	Very little	The decrease in the area sown and in the outturn is due to the untimely and excessive rainfall since the sowing season
	Mymensingh ..	4,052,480	2,405,700	562,100	545,500	500,000	106	75	Little	Small outturn anticipated, owing to excessive rain The normal area shown in column 5 ought perhaps to be raised, but my figures are so inadequate that I am not prepared to alter the figures without further enquiry All subdivisions except Tangail report a reduced area, owing to excessive rain
	Faridpur ..	1,459,840	1,116,900	100,000	105,000	110,000	100	75	About 1/3 of the last year's entire produce is estimated to be in stock.	The increase in area is due to early rain this year, but the outturn will be poor owing to excessive rain during the growth season
	Backergunge	2,335,360	1,408,000	10,000	10,000	10,000	100	50	Little	The outturn is expected to be much below the normal this year, owing to excessive rainfall at the sowing season.

*The figure in column 9 is probably an under-estimate.

Chittagong	Tippera	1,594,880	1,138,400	285,000	292,000	235,900	88	50	Little	Cultivation was retarded by drought, and the crop was subsequently injured by the abnormal rainfall of April	
	Noakhali	1,062,800	818,800	8,500	7,000	2,100	85	30	Very little jute remains in the district	The decreases both in the area sown and in the estimated outturn are due to excessive rainfall at the time of sowing In 1900 the area sown with jute was estimated at 1,900 acres In 1901 a special enquiry was made about the area under jute in this district. It came out from the enquiry that some lands formerly sown with paddy were sown with jute, and the estimated area thus sown was 7 000 acres. But the enquiry made this year shows a falling off It is entirely due to the excessive rainfall as explained above	
	Bhagalpur	2,704,640	2,097,000	21,900	22,300	23,200	109	100	No jute remains in the district from the crop of the year 1901		

Bhagalpur	Purnea	3,195,530	1,639,800	53,900	53,000	58,000	90	82	A little	The weather was unfavourable for this crop in the Kishanganj where it is extensively cultivated and in some parts of Sadar subdivisions hence a decrease in the outturn No extension of cultivation can be expected in face of the bad prices realised last year	
	Malda ...	1,216,000	672,800	32,500	30,900	29 200	87	93	Very little jute remains from the crop of 1901.	The cause of decrease in the area sown this year is due to low price of jute last year. On account of timely rainfall the outturn of this year is expected to be more than that of the previous year Enquiry is being made as to the approximate normal area under jute, but it is not possible to come to any conclusion unless farther enquiry is made for a year or two more, when the question of increasing or decreasing the normal area can be considered.	
Orissa	Cuttack	2,323,300	1,161,200	4,800	5,600	5,900	90	100	Small quantity	Owing to favourable rainfall the area sown has increased by about 300 acres, and at least the average outturn is expected	
	Balasore	1,334,363	870,800	2,600	3,000	4,700	85	100	Little ..	The increase in area and outturn is due to seasonable rains.

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park Street Observatory). The barometer is about 3 feet higher at Alipore, and, other things being equal, reads therefore 003 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently about 0°·5 higher, and, finally, the thermometer which furnished the record of temperature at the Surveyor-General's Office during 20 years and upwards is found to read 0·6 higher than the Kew Standard thermometer, which is the standard of reference at the present Observatory.

The mean pressure, temperature, etc., are deduced from the traces of the Barograph and Thermograph, and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

REVENUE DEPARTMENT—(AGRICULTURE)

NOTIFICATION—No 1471T—R

The 7th July 1902 — It is hereby notified for general information that the Lieutenant-Governor has been pleased to sanction the following revised rules for the admission of students to the Bengal Veterinary College and of animals into the Veterinary Hospital attached to it, in supersession of those published under Notification No 523T—R., dated the 14th June 1899 —

Rules for admission of students to, and regulation of their studies in, the Bengal Veterinary College

1 The course of study for the diploma of qualification will extend over at least three years Each year will comprise nine teaching months, and will be divided in accordance with the terms of the Calcutta Medical College.

2 New students are required to join on the 15th April, in order to give them time to settle down and acquire some practical knowledge of the work before the lectures commence on the 1st July

3 Each candidate for admission as a student is required to produce the following certificates —

(*a*) of age (no applicant under 16 years of age can be admitted as a student),
(*b*) of physical fitness and of good morals;
(*c*) that he has passed the Entrance examination of the Calcutta University, or has been promoted to the first class of a High School, or has passed the Middle English Scholarship examination

The College Medical Officer will examine the candidates as to physical fitness

As the teaching will be in English, a good colloquial knowledge of that language is important, which will be tested by the College staff

There will be no restrictions as to the caste or nationality of students.

It is desirable that students should on admission be between 18 and 26 years of age

4 All applications for admission as a student are to be made in writing to the Principal of the Bengal Veterinary College, who will decide on the advisability of admission in all doubtful cases

5 Government will allot annually not less than 30 stipends each of the monthly value of five rupees

There will be three classes of stipends—

(*a*) For first year students, or Class "A," tenable for eleven-and-a half months, from 15th April to 31st March following
(*b*) For second-year students, or Class "B," tenable for twelve months, from 1st April to 31st March following
(*c*) For third-year students or Class "C," tenable for twelve months, from 1st April to 31st March following

6. The stipends will be held conditionally on the good behaviour and satisfactory progress of the holders

7 The stipends will be awarded by the Principal after such examination or other test of the fitness of the candidates as he may think right to prescribe

8. The Principal may stop the whole or part of the stipend of any District Board or other student for indifferent progress or misbehaviour, and shall make a note of such occurrences in the student's monthly progress report.

9 Annual examinations will be held in March for the first and second year students, in order to determine their qualification for promotion to Classes "B" and "C" The stipends mentioned in rule 5 (*b*) and (*c*) will be allotted in accordance with the results of the annual examinations

10 It shall be within the discretion of the Committee of Management to decide how many stipends are to be awarded to each class in any year.

11. A student already in the enjoyment of a stipend or a scholarship shall not be eligible to compete for a Government scholarship

12 The stipend of a student who fails at a yearly examination shall be stopped altogether, or for such period as the Principal deems desirable

13. The Principal will report to the Committee as to the desirability of retaining any student who has failed at the annual examination

14 All students shall be bound to conform to the rules of the College and to attend during the hours of instruction, unless specially granted leave of absence.

15 A student absenting himself without leave from the Practical, Gymnastic, or Riding Class, or from a lecture, will be liable to fine

16. The students may be divided into batches for attendance during the vacations in order that the work of nursing and dressing the sick may not suffer. The stipend of any student who fails to attend in his turn will be paid to his *locum tenens*.

17. In addition to the Government stipends, the Sheo Baksh Bogla Veterinary Scholarship of Rs 9-8 per mensem will be available. It was founded by Dr Kenneth McLeod, late Professor of Surgery at the Calcutta Medical College, in 1892, in recognition of

Raja Sheo Baksh Bogla's liberality in connection with the establishment of the first Veterinary School and Hospital in Bengal, and is subject to the following conditions —

(1) that the candidate must have passed (a) the Entrance Examination of the Calcutta University, or (b) Middle English, or (c) the Middle Vernacular Scholarship Examination, preference being given to those examinations in the order stated,
(2) that in awarding the scholarship, preference be given to an inhabitant of the district of Jessore,
(3) that in the event of more than one candidate possessing the necessary qualification coming forward, preference be given to the candidate who has attained the highest number of marks in the examination
(4) that the scholarship be tenable for a period of three years in connection with the Bengal Veterinary College

18 The Principal will select such candidates as he may consider fit to fill the vacancies in the list of Government stipends and to obtain the Sheo Baksh Bogla Scholarship according to the prescribed conditions. He will report his nominations to the Committee

Lists of the students who have passed the examination successfully will be published as soon as possible after completion of each examination

26 A diploma as Graduate of the Bengal Veterinary College will be awarded to students who have gone through a full course of study at the College and have passed the final examination. Special certificates of proficiency will be awarded to students who have passed the final examination, and who have, during their period of study, been elected clinical clerks, prosectors, and monitors, and have performed their duties satisfactorily

27. Strict discipline will be maintained within the College Infringement of rules and regulations by students will be punished by fines, rustication, expulsion, or such other punishment as may be considered advisable by the Principal after due enquiry Each student, when his name is enrolled on the College books, will receive a copy of the rules and regulations, and on entering the College he will be required to acknowledge by signature his acceptance of such rules and regulations as are in force when he enters, and also such as may be authoritatively introduced from time to time.

28 All officials and servants of the College will be under the control of the Principal for discipline and the due performance of their duties

29 The officers of the College in accepting their appointments will be considered to accept the rules and regulations then in force and such modification as may be made from time to time under due authority Each officer will be held responsible for the exact performance of the duties in his branch of the College work and for the results of his teaching

30 The Principal and Assistant Principal will exercise general supervision over all departments and be in immediate charge of the hospital wards, pharmacy, library, and other parts of the College The officers engaged in instruction will every week make a report to the Principal of the attendance of the students at their classes and of the individual progress as shown at weekly oral examinations They will record the matter taught by them weekly in the form of a syllabus for the information of the Principal and Examiners

31 The Instructor in shoeing will be in immediate charge of the forge building, and will be held responsible for the condition of the feet of all animals in hospital

32. Clinical clerks will be selected from the senior and more experienced students, and each in turn placed in charge of one of the wards of the hospital to superintend the medical treatment, nursing of the patients, and proper record of cases Satisfactory performance of the duties of clinical clerk will be recognised by the award of a certificate on graduation

33. Every student who is not a clinical clerk will perform the duties of dresser. He will be responsible that all instructions as to the nursing and medical treatment of the animals under his charge are carried out by himself.

34 Two students, to act as prosectors, may be appointed by the Lecturer on Anatomy every session To them will be entrusted the preparation of all "subjects" required to illustrate his lectures, the hanging of diagrams, placing of specimens on the lecture table, &c Satisfactory performance of these duties will also be recognised by the award of a special certificate.

35. The Principal will furnish a monthly report during the terms to each person or body of persons by whom the students are supported at the College as to their regularity of attendance, progress, and conduct while on the College premises The progress of each student will be judged from the weekly examinations

36. Damage to property in the College (as writing on or defacing the doors or walls) is strictly prohibited The Principal will periodically inspect all the buildings of the College, and enquire into any damage that may have been done

37. Tables of the times and subjects of the lectures will be posted on the Notice Board at the commencement of each term, to which both teachers and students will adhere

38 A library and reading room will be established in the College to assist the students and for professional reference. It will be conducted under special rules, which will be posted up in the room and which will be strictly observed

39. Models, mounted specimens, diagrams, and expensive instruments, not frequently required, will be kept in the museum They will there be on view for purposes of study, but in no case be removed except by the teachers when required for use in the lecture room or hospital

40. The museum will be under the charge of a Curator, who will be responsible for order and discipline in the museum.

41. The records of the College will be kept by the clerk under the immediate supervision of the Principal or Assistant Principal

42. The records of the hospital will be kept by the clinical clerks under the immediate supervision of the Assistant Principal.

43 The class-rooms and library of the College will be available for students' meetings at the discretion of the Principal. No students' society, bearing the name of the College, may be formed without his consent

44. The dissecting-room will be open during daylight to all students, but advanced students only will be allowed to dissect there under the supervision of the Instructor on Anatomy, whose duty it will be to distribute "parts" and "subjects" and record attendance and work

45 Dissections will be carried on throughout the cold weather session, between 1st November and 28th February, and no student shall, on any pretext whatsoever, be exempt from this most important part of his duties The strictest discipline, cleanliness, and order are at all times to be preserved in the dissecting-room

46 A small plot of ground will be arranged on the premises as a botanical garden in such a way as to render it of value to the students in obtaining practical acquaintance with medicinal, dietetic, and poisonous plants It will at all times be open to the students, and the gardener will, so far as possible, supply them with plants for the practical study of botany

47 *Post-mortem* examinations are to be made in the case of all animals dying in the hospital, except when the owner has expressed a wish to the contrary The result will be recorded in a book kept specially for the purpose.

48 The isolation wards will, when occupied, be placed in charge of a special clinical clerk fully instructed as to the measures necessary for the protection of the attendants and the prevention of contagion

49 The pharmacy and drug store will be in the immediate charge of the Assistant Principal No student or attendant will be allowed to enter into this part of the hospital without special permission The Hospital Assistant will be responsible for the proper preparation of medicines, and that neither waste nor mistakes in dispensing be made

50. Menial servants of the College as sanctioned by Government are to be mustered monthly in the presence of the Principal and then receive their pay They will hold their posts during good behaviour and satisfactory performance of their duties Their work will be explained thoroughly to them before they join, and they will be constantly in attendance daily for such hours as may be determined from time to time

CHITTAGONG DIVISION.

Rules for the admission of Private Students to the University Examinations of 1903.

I —ENTRANCE EXAMINATION.

1. A student who does not appear from any school, or who has been transferred since the 1st of September next preceding the examination, without the consent of an Inspector of Schools, to the school from which he appears, will be treated as a private student.

2. The term "private student" includes school-masters

3. Private students are required to attend the test examination of one of the under-mentioned high schools, on dates to be fixed by the Head-masters.—

(1) Comilla Zilla School
(2) Brahmanbaria Annada High School.
(3) Chandpur High School
(4) Noakhali Zilla School.
(5) Feni High School.
(6) Chittagong Collegiate School (with the Principal's permission).
(7) Chittagong Madrasa.
(8) Chittagong Municipal High School.
(9) Rangamati Government High English School.

4 Applications for permission to appear at the test examination should be made to the Inspector of Schools, and they must reach his office on or before the 15th November 1902.

5. Every private candidate shall state in his application whether he is an ordinary private candidate or a school-master, his age, residence and father's name, the school at which he desires to appear for the test examination and his postal address, which should be written legibly and distinctly, so that no mistake may be likely to occur.

6. A private candidate who is not a school-master should file with his application the Transfer Certificate (in original) granted him from the school in which he last studied; or, if he failed at a previous Entrance Examination and did not join a school afterwards, the Registrar's receipt (in original) for the fee paid; or he will furnish satisfactory proof that he has not failed at the test examination of any entrance school in the current session, and that he is of good moral character.

7 A school-master will have to file with his application a certificate from the Secretary or Proprietor of the school in which he is serving to the effect that he has been a *bonâ fide* paid teacher of the school since the 2nd June 1902 In case he has served in more than one school, he must produce certificates from the several schools of his having been a *bonâ fide* paid teacher all along since the 2nd June 1902

8. If this office is satisfied that the necessary conditions have been fulfilled, the permission asked for will be granted and sent to the applicant, who must produce it before the Head-master of the school at which he desires to appear for the test examination

9 A private candidate should be identified to the satisfaction of the officer conducting the test examination.

10. Each private student will pay a fee of Rs 2 to the Head-master of the school at which he appears for the test examination. The fee is intended to meet the cost of the examination and charges for postage, &c.

11 The Head-master of each of the abovenamed schools is requested to direct the private candidates who may pass at the test examination from his school to appear before him on a fixed date, which should not be later then the 2nd January, and cause them to fill in the forms of application for admission to the Entrance Examination in his presence. He will then sign the certificates appended to the applications, and forward them to this office (in a registered cover, if sent by post) for countersignature Under no circumstances should the entrance fee be sent to this office.

12. After countersignature the applications will be sent by the Inspector direct to the candidates, who must make their own arrangements for the transmission of their applications and fees to the Registrar of the Calcutta University, so as to be received at his office on or before the 22nd January 1903.

13. The Entrance Examination will be held on the 2nd March 1903 and following days

II —F.A. AND B.A. EXAMINATIONS

1. Deputy Inspectors of Schools, Sub-Inspectors of Schools and *bonâ fide* masters of English schools, who have served as such for the full period of two academical years after passing the Entrance, will be admitted to the F A examination; and those who have served for the same period after passing the F.A will be admitted to the B A. Examination. Candidates who have failed in the F.A or B A. examination may be admitted to the same examination if they have served for a term of six months since the date of the last examination.

2 By *bonâ fide* masters of English schools are to be understood teachers who hold regularly paid appointments in recognised English schools teaching at least the Middle English course

3. All applications from school-masters to the Inspector for permission to appear at the F A. or B A. examination should be accompanied by certificates of length of service (with dates) from the Secretaries of the schools in which they are employed, and should reach this office not later than the 5th January 1903.

4 The application of a school-master for admission to the F A or B A examination should be signed by him in the presence of the Secretary or a member of the Managing Committee of the school in which he is employed It should then be forwarded to the Inspector for his signature, accompanied by (1) a certificate from the Secretary or a member of the Managing Committee to the effect that it has been signed by the candidate in his presence, (2) the University certificate of the candidate in proof of his having passed the Entrance or F A examination, as the case may be, and (3) the Registrar's receipt to prove, if this be the case, that the candidate has appeared at the examination of any previous year. The B.A. candidates should also send in their Entrance pass certificates

5. After signature by the Inspector, the application, together with the documents that accompanied it, will be returned to the candidate, who will have to send the application and the examination fee to the Registrar of the Calcutta University, so as to reach his office on or before the 2nd February 1903.

6. The F A and B A. Examinations will be held on the 16th March 1903 and following days.

GOVERNMENT OF INDIA.

HOME DEPARTMENT.

APPOINTMENT OF A COMMISSION TO INQUIRE INTO THE ADMINISTRATION OF THE POLICE IN BRITISH INDIA.

Nos. 510—527.

Extract from the Proceedings of the Government of India in the Home Department (Police),— under date Simla, the 9th July 1902.

RESOLUTION.

The Governor-General in Council has determined, with the approval of the Secretary of State, to appoint a Commission to inquire into the administration of the police in British India.

2. The matters into which the Commission will inquire and report are—

(i) whether the organization, training, strength, and pay of the different ranks of the district police, both superior and subordinate, foot and mounted, whether on ordinary duty or in the reserve, are adequate to secure the preservation of the public peace and the proper investigation and detection of crime, and, if not, what changes are required in them, respectively, in each province with regard to its local conditions, in order to attain these objects;

(ii) whether existing arrangements secure that crime is fully reported or require to be supplemented in any way, and, in particular, whether the village officers and the rural police in each province are efficient aids to the district police in the matter of reporting crime, and, if not, how the relations between the former and the latter can (subject to the condition that the rural police in each province must not be enrolled under the Police Act) be improved;

(iii) whether the system of investigating offences now in force in each province, the object being to provide for the full investigation of all serious crime, while avoiding interference by the police in trivial matters, is capable of improvement, and, if so, in what manner; and whether the institution of fully-organized Criminal Investigation Departments, either Imperial or Provincial, is recommended;

(iv) whether the form of statistical returns now adopted is satisfactory or capable of improvement, and whether the use to which such returns are now put as tests of police working is appropriate or not;

(v) whether the general supervision exercised by the Magistracy over the police, and the control of the superior officers (including Inspectors) over the investigation of crime are adequate to prevent oppression on the part of the subordinate police, and, if not, how they can be made so;

(vi) whether the existing organization of the railway police, its operation as between provinces and states, and its connection with the district police are in a satisfactory condition, and, if not, what improvements can be effected; and

(vii) whether the career at present offered to natives in the police in each province is sufficiently attractive to induce the proper stamp of men to enter it; and, if not, what steps can be taken to remedy this evil consistently with the recognized measure of necessity for European control in the district charges.

3. It is to be understood that, while in some matters [as, for instance, those referred to under heads (iii), (ii) and (vi)] it is important to secure uniformity throughout India, in others and especially in those dealt with under head (i), uniformity is neither desirable nor possible; and that what should be aimed at is not mechanical symmetry, but due proportion with regard to such considerations as the criminality of the people, the number and gravity of the offences to be dealt with, the density of the population, the area to be policed, and so forth.

4. The Commission will consist of the Hon'ble Mr. A. H. L. Fraser, C.S.I., Chief Commissioner of the Central Provinces, President; the Hon'ble Mr. Justice Candy, Puisne Judge of the Bombay High Court; the Hon'ble the Maharaja of Darbhanga, K.C.I.E., Additional Member of the Council of the Governor-General; the Hon'ble Srinavasa Raghava Aiyangar, C.I.E., Dewan Bahadur, Additional Member of the Council of the Governor of Madras; the Hon'ble Lieutenant-Colonel J. A. L. Montgomery, Member of the Council of the Lieutenant-Governor of the Punjab; Mr. W. M. Colvin, Barrister-at-Law, of Allahabad; and Mr. A. C. Hankin, C.I.E., Inspector-General of Police in the Hyderabad State. The Secretary of the Commission will be Mr. H. A. Stuart, Inspector-General of Police in the Madras Presidency. During the visit of the Commission to each province, where its inquiries will be conducted, a local member will be appointed to the Commission by the Local Government or Administration, in order to represent the views of the local authorities and to see that the local circumstances and conditions are fully laid before the members of the Commission. The local Commissioners will not be required to join in the preparation of the final report.

5. In order to facilitate the inquiries of the Commission, and to ensure that a definite and concise statement of the case as it presents itself to each Local Government and Administration may be placed before the Commissioners in anticipation of their inquiries, each Local Government and Administration should proceed without delay to appoint a Committee, consisting of a District and Sessions Judge, a District Magistrate, and District Superintendent of Police, in the provinces of Madras, Bombay, the United Provinces, and the Punjab, and elsewhere of a District Magistrate and District Superintendent of Police, to proceed to such districts as are considered most important from a police point of view, and inquire into the matters set out in the heads of the order of reference. The Bengal Government has recently made a local inquiry into the organization of the police in that province, and the Government of India will therefore not require a local Committee to be appointed in Bengal. The Government of India are not aware that any other Local Government or Administration has recently collected, by means of a similar inquiry, the material necessary to prepare its case for presentation to the Commission, but in any province in which this has been done, a local Committee need not be appointed unless the Local Government or Administration desires to follow this course. It is not intended that the Committees conducting these preliminary inquiries should record any formal evidence or prepare a formal report. They should discuss the questions referred for the opinion of the

Commission orally on the spot, taking particular care to ascertain the views of non-official natives of India on them. On the completion of their inquiries they should present a statement of the case into which the Commission is to inquire for the consideration of the Local Government or Administration. This statement would describe the existing arrangements in each province under each of the heads of reference; note the defects which had been brought to the notice of the Committee and the remedies which had been proposed, suggest the officials and non-officials that would be most able to assist the Commission in the capacity of witnesses; and, while avoiding the discussion of either defects or remedies (beyond noticing the degree of importance attached to each by public opinion generally), serve as a summary of the case for inquiry to be placed, together with the views of the Local Government upon it, before the Commission for its information and assistance. It is intended that the Commission should assemble on the 15th of October, and it is necessary that the Committees to undertake these preliminary inquiries should be appointed and set about their business without any delay, since the provincial statements of the case should reach the Government of India in time to be placed in the hands of the members of the Commission before they enter upon their labours.

6. The general inquiry will be public, and its conduct and the regulation of the course of business are entrusted to the President in communication with the members. The inquiries of the local Committees will place before the Commission valuable information as to the witnesses who may be expected to assist it in its work, but this arrangement is not intended to limit the Commission in the selection of any witnesses whom it may desire to examine. The Governor-General in Council leaves it to the President to determine the procedure to be adopted in obtaining and recording evidence. The Commission, through the Secretary, acting under instructions from the President, will correspond directly with Local Governments. The Governor General in Council desires that all communications or requisitions for information emanating from the Commission may be treated as urgent and complied with promptly, and that, in each province which the Commissioners visit, they may be afforded every facility for prosecuting their inquiries.

ORDER.—Ordered that a copy of this Resolution be forwarded to all Local Governments and Administrations, and to the President and members of the Commission for information and guidance.

Ordered, also, that the Resolution be published in the *Supplement to the Gazette of India*.

Conditions

That the land shall be subject to all existing rights of way and water and other easements.

That the right of using all streams and channels in any way navigable shall be reserved to the public, as also the use of a towpath not less than 25 feet in width on each side of every such stream and channel

That no charge will be made for wood and timber standing on the land at the time it is leased, nor for any wood which may be cut and burnt to effect clearances, or which may be used on the land. But for wood and timber exported for sale a duty shall be levied at such rate and in such manner as may, from time to time, be prescribed by Government.

That the Government reserves to itself the right to all minerals on the land, together with such rights of way and other reasonable facilities as may be requisite for working, getting, and carrying away such minerals. It also retains its proprietary right in the land, and only confers on the lessee an occupancy right, which shall be hereditary and transferable.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE MONTH OF JUNE 1902.

WEATHER was unusual in several important respects during the greater part of June Pressure was almost continuously low in the north, and especially in the north east, so that, as there was a somewhat steeper pressure gradient than usual, the southerly moist winds were diverted towards Assam and the eastern parts of the Province Rainfall was in consequence very heavy at eastern stations while conditions were favourable for rainfall, and that was at the end of the second and beginning of the third week For about a week at that time heavy falls were of almost general occurrence in Assam and the adjacent parts of East and North Bengal.

Showery weather was fairly general in the early part of the month, even in the western districts, but being due to local disturbances, resulting from the light variable winds then prevalent, the rainfall was generally light After the commencement of monsoon conditions in the east, which occurred about the 11th, rainfall almost entirely ceased in the west of the Province, and hot season conditions with high temperature prevailed

For the month as a whole, Chota Nagpur received 33 per cent, Orissa, Bihar and South-West Bengal about 60 per cent., North Bengal 108 per cent, and East Bengal 131 per cent. of the normal In Assam, Silchar, Dhubri and Tezpur received excess rainfall by amounts varying from 2·5 to 5·6 inches, while at Dibrugarh and Sibsagar there was defect, 1 inch at the former and 5·4 inches at the latter.

The large temperature variations which accompanied the irregular distribution of the monsoon rainfall have affected the average temperature considerably, and most so in the western districts, where little or no rain fell during the latter half. Mean excess in Chota Nagpur is 3°·6, in Orissa and Bihar more than 1° In Bengal Proper mean temperature was almost normal, and in Assam there was defect of about 1° Very high day temperatures were recorded, the highest in Chota Nagpur and Bihar being 111°, in Orissa 110° and in South-West Bengal 106°.

As already stated, showery weather was more frequent than usual in the early part of June, in which respect there has been a noticeable peculiarity throughout the past hot season With the commencement of monsoon conditions a marked change took place, rainfall ceased in the west of the Province, and heavy rainfall became general in the east. This change was due to the only cyclonic disturbance which occurred over the Bay during the month

The first sign of disturbance was on the 6th, when a diffused depression was shown over the north and centre of the Bay, and the pressure gradient in the south became steeper, with stronger south-westerly winds in that area A fairly regular cyclonic circulation of light winds prevailed over the Province and the Bay. After a general rise of pressure during the subsequent 24 hours the depression had almost disappeared The only trace of its existence was in the relatively low pressure in Burma Pressure again fell on the 9th and continued to fall slowly or moderately until the 13th, when there was a slight depression over the Bay and a steep pressure gradient over the south and centre of the Bay This shallow depression, without intensifying, moved north-eastward towards Assam, and with its advance heavy rainfall became general at eastern stations

As the steep pressure gradient followed the depression northwards, wind force increased in the north of the Bay, and the highest velocities which accompanied the disturbance were felt in the extreme north-west angle On the 13th the average velocity at Diamond Island was 20; on that and subsequent days the highest velocity reported from the Orissa coast was 24; while at Saugor Island from the 15th to the 17th strongish winds, averaging about 30 miles an hour, continued.

The disturbance which probably continued between the 7th, when it first appeared, and the 13th, when it was close to the north of the Bay, differed from the typical storms of the early monsoon season in two respects. It failed to develop into a cyclonic storm of any severity, and it moved north-eastward instead of in the usual north westerly direction. After the low pressure area moved towards Assam, the pressure gradient was much steeper than usual in that direction for some days. On the 14th the difference from normal pressure varied from excess of ·05 inch in the south of the Bay to defect of ·2 inch in part of Assam, and though this rather large difference slowly diminished on subsequent days, it was not till nearly the end of the third week that the pressure distribution had become approximately normal. There was then a small to moderate excess over the greater part of the Province and the Bay.

Throughout that period from the 13th to about the 20th there was a strong indraught from the Bay towards East Bengal and Assam, and it was during those days that a considerable part of the rainfall of the month fell The days of heaviest rainfall in East Bengal were the 14th to 17th and in North Bengal the 18th to 20th. The area of lowest pressure moved slowly westward, and at times rainfall became more general in the western districts, the only day on which there was any marked westerly extension was on the 17th, when

fairly general falls occurred in Orissa and North Bihar In Chota Nagpur and South Bihar only a few light scattered showers fell.

The pressure gradient continued favourable for rainfall between the 21st and 24th, but the falls became daily less general On the 25th a rapid rise of pressure began in the north-east and extended south-westward The rapid change was accompanied by a few local showers, but monsoon rainfall ceased over almost the whole Province. The pressure distribution was more uniform than usual over both the Province and the Bay, and during the last week temperature rose, not only in the western districts, but also in North Bengal and Assam, until an important series of changes commenced in the north-east at the close of the month These changes are difficult to account for A fall of pressure began in North Bengal, and as it advanced south-westward heavy rainfall occurred first in North Bengal, then over almost the whole of Bengal Proper, and as the disturbed conditions advanced local storms with rainfall and a rapid fall of temperature became general in the western districts On the last day of June most of the stations in East and North Bengal reported between 2 and 4 inches The pressure changes on that date were such as would indicate the movement of a shallow depression from north-east to south-west, a rare occurrence in the monsoon season, and the temperature variation from the normal ranged from defect of 6° in Assam to excess of 12° in the west of Bihar and Chota Nagpur In the early days of July this high temperature in the western districts disappeared, and whatever the causes of those large changes may have been or from whatever direction they may have originated, weather more characteristic of the monsoon season succeeded them over the whole Province

Pressure, though not subject to large changes during June, underwent considerable variations and was at times unusual for the season In the early part of the month there was a rather large excess over the Province, and a more uniform distribution than usual over the Bay As the slight depression developed over the Bay, this excess inland disappeared, and with the north-easterly movement of that disturbance a rather large defect became established in the eastern and more especially the north-eastern districts The defect and the accompanying steep gradient over the Bay continued during the third week, and gradually disappeared between the 22nd and 24th The most noticeable changes during the month occurred between the 25th and the 30th—first the rapid rise, then the passage of a shallow depression from north-east to south-west accompanied by the remarkable changes already noticed.

On an average for the month the difference from the normal varied from excess of 01 inch, general in Orissa, Chota Nagpur and South-West Bengal, to defect of 01 inch in North Bengal and Assam

Temperature.—During the early part of the month, while local storms were of fairly frequent occurrence over the greater part of the Province, temperature was low generally, and at times several degrees below the normal After pressure fell in the east and dry westerly winds became general in the western districts, ordinary hot season conditions were restored with high temperatures, especially in the latter part of the month A marked contrast obtained between the eastern and western districts during the second and third weeks In the former, where there was dense cloud and heavy rainfall, temperature was exceptionally low, while in the west hot season conditions continued with day temperatures of about 110°

The variation from the normal on an average for the month was small in the eastern districts, but in the west, notwithstanding the low temperature in the first week, there was a considerable to large excess.

Rainfall.—During the early part of the month scattered showers fell in all parts of the Province After the shallow depression entered East Bengal on the 11th, heavy rain fell in the eastern districts, and the showers which had up to that date been fairly frequent in Bihar almost ceased In Chota Nagpur and Orissa light showers were of occasional occurrence throughout the month

As the monsoon current was diverted eastward, the rainfall for the month was much heavier in East and North Bengal than in the central or western districts East Bengal received on an average 23 and North Bengal 19 inches, the former amount being more than 5 inches in excess of the normal In South-West Bengal, Bihar and Orissa the fall was little more than half the usual amount, and in Chota Nagpur the fall was less than one-third the normal.

At individual stations the difference from the normal varies from defect of 5 inches in Chota Nagpur to excess of 10 inches in parts of East Bengal The area of excessive rainfall includes the districts of Rajshahi, Jalpaiguri, Bogra and Pabna, in North Bengal, and all the districts in East Bengal In all other parts of the Province, including Bihar, South-West Bengal, Orissa, and the western parts of East and North Bengal, defect was 2 to 4 inches

The following table gives the rainfall of the various Divisions of Bengal in June and in each of the previous months of the present year as compared with the normal values

for the same periods. The figures given represent the actual falls expressed as percentages of the normal falls :—

The mean pressure, temperature, etc., are deduced from the traces of the Barograph and Thermograph, and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; d, drizzling rain; p, passing temporary showers; t, thunder; ∠, lightning.

ENTRANCE TEST-EXAMINATION FOR PRIVATE STUDENTS.

1 By private students are meant those who do not appear from any school, or who have joined the schools from which they appear after the 1st September 1902, without the consent of the Inspector. "Private students" include school-masters.

2 All private students *without exception* are required to appear at the test-examination of a zilla school Private candidates from the Darbhanga district should appear at the test-examination of the Muzaffarpur Zillah School.

3. The first day of the test-examination in all the zilla schools will be the 15th December 1902

4 Each private student will pay a fee of Rs 2 for the test The balance, after payment of expenses (stationery, etc), will go as remuneration to the examiners

5 Private candidates for the test-examination should apply to this office not later than the 18th November 1902. They should forward the certificate granted to them under the transfer rules by the head-master of the school in which they last read, together with a certificate of good character from a respectable person If a candidate failed at a previous Entrance examination without again joining any school, the Registrar's receipt in original will be accepted in lieu of a transfer certificate

6. A student who failed to pass the annual examination for promotion to the 1st class in the end of session 1901-1902, and then left the school, can under no circumstances be allowed to appear at the Entrance examination of 1903.

7. The application forms for permission to appear at the Entrance examination will be signed by the head-master of the zilla school at which the candidates have put in their tests, and will be forwarded by him to the Inspector for countersignature, on or before the 10th January 1903

8. These applications (with the appointed fee) must be forwarded to the Registrar of the Calcutta University by the candidate, when all formalities are concluded, so as to reach him on or before the 22nd January 1903.

9. The next entrance examination begins on 2nd March 1903.

F A. AND B A. EXAMINATIONS.

Deputy Inspectors of Schools, Sub-Inspectors of Schools, and *bonâ fide* school masters of two years' standing, or of six months' standing in the case of those who have been admitted to a former examination of the same class, will be admitted to the above-mentioned examinations. These latter must serve for six months since the date of the examination *last held by the University*, *i.e*, in the year previous to the examination to which they wish to be admitted, and they must complete six months' service *before* the submission of their applications to the Inspector for countersignature The applications of school-masters should be accompanied by a certificate of length of service (with dates) from the Managers of the schools in which they are employed, together with Entrance or F.A. pass certificates, or in the case of plucked candidates with the Registrar's receipt for the last F.A. or B A examination, as the case may be, and should reach this office not later than the 15th January 1903.

Candidates should read carefully the certificate which this office is called upon to sign. and should be careful to supply all information and documents required, without which the Inspector must decline to sign the certificate.

The F.A. and B A examinations begin on the 16th March 1903.

These applications with fees must be forwarded to the Registrar of the Calcutta University by the candidates themselves so as to reach him on or before the 2nd February 1903.

LAND SALE NOTICES.

Advertisement of Sale.

NOTICE is hereby given that the proprietary right of Government, as specified in the conditions of sale below, to the undermentioned estate, situated in the district of Rajshahi, will be put to sale at the Rajshahi Collectorate on the 1st September 1902, corresponding with 16th Bhadra 1309 (B.S.)

The purchaser will be subject to the following conditions of sale:—

Conditions of Sale.

1st.—The estate to be sold to the highest bidder above the upset price, which will be fixed by the Collector at the time of sale. The purchaser of this estate will be considered as the proprietor of the estate, and the entire proprietary right of Government in such estate will be transferred to him, subject to the revenue fixed in perpetuity.

2nd.—The sale to be subject to existing leases and to the rights conferred by the settlement proceedings and by the laws in force, and purchasers to be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the revenue authorities.

3rd.—If the amount of purchase-money do not exceed Rs. 100, the whole amount to be paid down at once.

4th.—If the amount of purchase-money exceed Rs. 100, one-fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or, if that day be a close holiday, then by noon of the first succeeding office day, the sale is to be cancelled (the sum deposited being forfeited to Government), and the estate to be again put up to sale at the risk of the defaulting purchaser, after issue of advertisement, as in the case of original sale.

Lye mun point—Position of light. Hong Kong harbour—Prohibited anchorage.

WITH reference to Notice to Mariners No. 68, dated the 10th March last, issued by this office, the British Admiralty has given further notice (No 337 of 1902) that the position of the *fixed red* light, exhibited from a gibbet on the shore near Lye mun point, is 3¼ cables N. 72° E from Kung am

Approximate position, lat 22° 17½′ N., long. 114° 14¼′ E.

Also, that anchorage is prohibited in the vicinity of the telegraph cable crossing the harbour from near the Admiralty Dock at Kaulung to a position west of north point Hong Kong The prohibited area is marked by beacons which have been moved as under —

At Kaulung—

The eastern beacon has been shifted 300 feet S. 79° E. from its former position.
The western beacon has been shifted 540 feet S. 72° W. from its former position.

At Hong Kong—

The eastern beacon has been moved 310 feet N. 55° E. from its former position
The western beacon remains unaltered.

The red lights exhibited from these beacons are screened as before, viz., so that when two lights on the same side of the harbour are visible anchorage is prohibited.

Approximate position, lat. 22° 18′ N., long 114° 10′ E.

MUNICIPAL DEPARTMENT—MEDICAL.

Darjeeling, the 15th July 1902.

RESOLUTION—No. 1414T.—M.

READ—

The Triennial Report on the working of the Charitable Dispensaries in Bengal and the Calcutta Medical Institutions for the years 1899, 1900, and 1901

Read also—

The Triennial Report for the years 1896, 1897, and 1898 and the Annual Returns for the years 1899 and 1900 and the Resolutions recorded upon them.

The Triennial Report has undergone considerable modification in consequence of the orders of the Government of India contained in the Resolution of the Home Department, No. 2741, dated 26th March 1901, and now presents a complete review of the working of all the medical institutions of the Province during the triennium. In spite of the inclusion of new material, the body of the report has been reduced by one-half.

2. The chapter on *Calcutta Medical Institutions* is new, the subject having hitherto been dealt with in a separate annual report. The increase in their number from 15 to 17 is due to the inclusion in 1900 of the Municipal and Dockyard dispensaries at Kidderpore. The out-patients for each of the three years numbered 219,302, 251,822, and 253,615, respectively, giving an average of 241,579, against 235,706 in the preceding triennium. The year 1900 was unhealthy, with a death-rate of 43·32 per mile, but in 1901 the increase of attendance was still maintained, although the general health had much improved. There was a considerable decrease of indoor patients, but the number of out-patients was kept up by the increased attendance of persons suffering from minor illnesses. This is an indication of the increasing popularity of the outdoor departments of the hospitals, of which the Medical College Hospital was the most conspicuous. The Inspector-General mentions three hospitals where the outdoor attendance fell off in 1901, and there seem to have been defects in the management, about which enquiries will be made.

The number of indoor patients was highest in 1900, owing to the un healthy conditions of the year. In 1901 there was a decrease from 28,372 to 25,989. There is a considerable disproportion between the number of beds available and the requirements in the different hospitals. In the Campbell Hospital there are 752 beds, of which 428 were occupied on an average, and in the Presidency General Hospital there are 234, of which 154 were occupied. There were on an average 600 unoccupied beds in the different institutions. The popularity of the Sambhu Nath Pandit Hospital resulted in overcrowding both in 1900 and 1901, and further accommodation is being provided. The Dufferin Victoria Hospital in 1901 increased its number of patients from 158 to 382.

The rate of mortality among patients was 14·60, 17·57, and 15·70 in the three years. A disproportionately high ratio is returned every year from the Campbell and Howrah General Hospitals, but the Inspector-General is satisfied that this is due to the large proportion of moribund patients admitted into these institutions

3. It is with satisfaction that the Lieutenant-Governor observes the restoration of public confidence in the hospitals which the plague scare in 1898 had seriously impaired. Evidence of this is given by the increase in the number of women and children treated from 39,706 and 47,977 in 1898 to 49,095 and 60,130, respectively, in 1901, and by the steady increase in the number of patients treated for local diseases and injuries, whose attendance is unaffected by the prevailing health conditions of the year.

4. In paragraph 18 of his report the Inspector-General gives some account of the diseases most prevalent during the triennium. There was a decrease in 1901 of malarial fever and dysentery cases Cholera was epidemic in 1900 and small-pox in 1901. It is noticeable that disorders due to poisoning have steadily increased, and some inquiries are desirable on the subject. Explanation is needed of the considerable increase of tuberculous diseases and cases of cerebro-spinal fever, which are noticeable features of the period under report.

5. The nursing work at the principal hospitals receives favourable mention. The question of placing the nursing organisation on a more systematised footing, with the view of obtaining wider support from the public, is receiving the attention of Government.

6. *Charitable Dispensaries*—The total number of dispensaries, outside Calcutta, on the Government list was 492 at the opening of the period under review and 558 at its close. The rate of increase during the preceding triennium has thus been more than maintained, and 128 new dispensaries have been opened in the last six years. The Inspector-General remarks that Bengal is behind other provinces in the number of such institutions in proportion to its population, and refers to his previous suggestion that there should be a dispensary at every thana and in every town or rural area with a population of 3,000 persons. The Lieutenant-Governor is of opinion that the progress made in recent years has, on the whole, been satisfactory. It is true that the existing dispensaries serve a larger area than in other provinces, and that the average attendance at each is lower than in any other province

except Bombay. This the Inspector-General attributes partly to the fact that the proportion of rural to urban population is greater in Bengal than in other parts in India. But a more potent reason, as has on former occasions been pointed out, is the fact that the medical demands of the Province are to a large extent met by the native practitioners, who are to be found in every town or large village, and who do a great deal of free work for the poor. During the last five years the outturn of qualified practitioners from the medical schools of Bengal was three times that of the medical schools of Bombay and the Panjab. It does not appear that much has been done to carry out the proposals to supply medicine chests to village headmen, or to arrange for visits by dispensary officers to neighbouring markets, and the report contains so little information on these subjects that the Lieutenant-Governor invites the Inspector-General to give him more details as to the areas in which the experiment has succeeded. The plan was well meant, and experience may give useful suggestions.

Not only are dispensaries more numerous, but the number of patients treated has increased in a more than corresponding ratio. The total number of patients treated during the three years was 10,470,463, against 8,398,567 in the preceding triennium, showing a ratio per cent. of population of 4·72 against 3·95. During 1901 the percentage of population treated rose to 5·02 The chief increase was in outdoor patients, as in Calcutta, which is a proof that the attention to small amenities, and the respect to class and caste prejudices, which Colonel Hendley has assiduously inculcated, have resulted in an undoubted growth of popularity This is also proved by the increased attendance of women and children by 28 and 31 per cent., respectively, over the numbers in 1897. As is natural, charitable relief is much more sought in urban than in rural areas Some remarkable variations are, however, shown; the percentage of patients to population being as high as 351·13 in Noakhali and as low as 11·46 in Khardaha and 16·75 in Puri. The Inspector-General is making inquiries into the causes of these low returns, but it will probably be found due to the different methods of calculating the population served by the dispensaries.

The number of indoor patients increases slowly, and the daily average rose from 1,976 in 1899 to 2,177 in 1901. The number of beds available rose from 3,436 to 3,628. Attempts are being made to make the indoor wards more popular by providing separate quarters for pauper and moribund patients, and this has been done in 22 dispensaries. The Inspector-General attributes the increased attendance in certain institutions to improvements in administration and management, and the Lieutenant-Governor will gladly help to make these more general. The death-rate of 1901 was considerably lower than that of the preceding years—a result also attributed to improved management. There has been some increase of surgical work, but this is clearly capable of expansion. Credit is due to the officers whose names are specially mentioned in the report.

It is unsatisfactory to find that Civil Surgeons have been less active in inspections during the past year, and Government awaits the report on the subject which the Inspector-General proposes to furnish after taking the explanations of the officers in default.

7. The number of dispensaries managed by local bodies has considerably increased, the most noticeable feature being the rapid growth from 157 in 1898 to 205 in 1901 of institutions under the management of District Boards. The Lieutenant-Governor is pleased to see that the complaint made in the last triennial report of lack of interest on the part of local authorities is not repeated. The income contributed by local funds to medical institutions, which in 1898 was about $4\frac{1}{4}$ lakhs, amounted in 1901 to over $5\frac{3}{4}$ lakhs. In the matter of management, moreover, an improvement has been effected by placing every dispensary, where possible, under a committee, representative not only of the controlling local authority, but also of the general public. This policy has been generally carried out, though the Inspector-General mentions certain places which for no apparent reason are still backward in this matter. In some cases the Committees have not worked well, and it is hoped that Commissioners and District Magistrates will use their local influence to remedy such defects as have been noticed.

8. The main object of appointing Committees is to interest the public in the good management of the dispensaries and to increase subscriptions. The financial results of the triennium show that this arrangement has been to some extent successful Of the total income of dispensaries, excluding the Calcutta institutions, which for the three years averaged Rs. 11,23,534, an average amount of Rs. 2,90,022, or 25·7 per cent., accrued from subscriptions, which now amount to over 3 lakhs, against 2¼ lakhs in the preceding triennium. In addition to the subscriptions many special donations were received, which are not included in the returns. The Lieutenant-Governor fully concurs in Colonel Hendley's appreciation of these individual gifts, but he agrees with him that there should be a larger number of regular subscribers among all classes. This is particularly the case in Calcutta, where the average amount of subscriptions during the triennium was Rs. 14,486, or only a little over 1 per cent. of the average income, of which sum over Rs. 12,000 was subscribed by Europeans. Receipts from the native community, the Lieutenant-Governor regrets to observe, annually diminish. He is constrained to share Colonel Hendley's opinion that the income derived from charity is not worthy of the capital of India Government contributed nearly 74 per cent. of the whole income of the Calcutta medical institutions. In the mufassal nearly 50 per cent. of the cost is borne by local funds, the income from which, as already indicated, shows a satisfactory increase. The average contribution from Government amounted to Rs. 1,15,140, or about 10 per cent. of the total income.

9. The expenditure on dispensaries has increased from Rs. 8,69,400 in 1898 to Rs. 10,40,168 in 1901. The increase is due mainly to the addition of new dispensaries and to the higher rate of contribution to the pay of Civil Assistant Surgeons, while additional miscellaneous expenditure was incurred on improvements in furniture and other matters intended to render the dispensaries more comfortable and attractive. The cash balance rose from Rs. 45,000 in 1898 to Rs. 1,41,485 in 1901. It is not clear why this balance, which in 13 per cent. of the total expenditure, should be so large. The investments of dispensaries increased during the three years by over 2½ lakhs. In Calcutta the charges were largely increased by heavy expenditure in each year on buildings, particularly in connection with the Medical College Hospital and the Presidency General Hospital. The opening of the new block in the latter Hospital, the additions to the staff, and other improvements have supplied a much-felt want.

10. The period covered by the review was one of considerable administrative progress. Among the reforms effected is the improvement in the position and prospects of the Subordinate Medical Service, which the Inspector-General confidently anticipates will have an important bearing on the working of hospitals and dispensaries. Among other innovations are the transfer of the control of Medical Education from the Director of Public Instruction to the Inspector-General of Civil Hospitals, the training of Civil Hospital Assistants in practical pathology and medico-legal work, and the abolition of the civil store of medicines maintained at district and subdivisional headquarters for Government servants.

11. The inspection work done by Colonel Hendley, and by Colonel McConaghey in the eight months during which he officiated as Inspector-General, was full and sufficient. The thanks of the Lieutenant-Governor are due to both, and especially to Colonel Hendley for his able administration of the Department. His report is a record of substantial and continuous progress.

By order of the Lieutenant-Governor of Bengal,

E. W. COLLIN,

Offg. Secretary to the Govt. of Bengal.

RESOLUTION ON THE REPORTS ON INLAND EMIGRATION FOR THE YEAR 1901.

GENERAL DEPARTMENT—EMIGRATION

Darjeeling, the 15th July 1902

RESOLUTION—No 1108T—G

READ—

The Report of the Superintendent of Emigration, Calcutta, on Inland Emigration for the year 1901.

Read also—

The letters from the (1) Commissioner of the Bhagalpur Division, No. 729J., dated the 14th May, and No. 770J., dated the 28th May 1902, and (2) Commissioner of the Chota Nagpur Division, No. 249J, dated 26th May 1902, forwarding with their remarks the reports of the Superintendents of Emigration in their respective Divisions

Introduction of the Assam Labour and Emigration Act, VI of 1901

The year 1901 was important from the changes in the administration of inland emigration. The new Act, which consolidated and amended the law relating to emigration to the labour districts of Assam, came into force on the 9th March 1901, repealing Act I of 1882 and Act I (B.C.) of 1889; the changes made in the law were reviewed in this Government's Resolution No. 2153, dated the 3rd May 1901. A revised set of rules under the new Act was published for general information in the *Calcutta Gazette* of the 16th October 1901 under Notification No. 3412, dated the 15th idem.

Arrangements for the working of the Act.

2. The Superintendent of Emigration, Calcutta, has stated at length the action taken by Government to ensure the proper working of the new Act. Five Superintendents of Emigration have been appointed for the following local areas, viz., (1) Ranchi and Palamau, (2) Singhbhum and Manbhum, (3) Hazaribagh, (4) the Sonthal Parganas, and (5) the remaining districts of Bengal. Since the close of the year a Travelling Superintendent has been appointed for Bengal and the Central Provinces. A whole-time officer was appointed Superintendent of Emigration and Registering Officer at Ranchi during the latter part of the year for the four busy months of the year, viz, December 1901 to March 1902.

In this Resolution the reports received from the Superintendent of Emigration in Calcutta as well as of the local Superintendents are reviewed.

Systems of recruitment

3. For the first portion of the year emigrants were recruited as in former years—(i) by licensed contractors and recruiters, (ii) by special local agents, (iii) by garden sardars, and (iv) went to the labour districts as "free emigrants." The special local agents system of section 62 of Act I of 1882 ceased to exist with the introduction of Act VI of 1901, and a new system of recruitment by specially-employed garden sardars under Chapter V, section 90 of the new Act became legal from the 15th July 1901 in the districts of Manbhum, Hazaribagh, and the Sonthal Parganas.

Number of emigrants.

4. Altogether 30,777 emigrants were despatched to the labour districts as against 65,190 in the previous year; 27,250 embarked at Goalundo and 3,527 at Jatrapur, Assam received 21,663, Cachar 2,596, and Sylhet 2,991 as against 46,635, 6,838, and 11,717 respectively in 1900. The great diminution is partly explained by the fact that the year 1900 was a famine year in Chota Nagpur, and is also ascribed by the Commissioner of that Division to wild stories having been circulated exaggerating the responsibilities incurred by garden sardars under the new Act. There is a further and, to the planter, more serious reason. Coal-mines in Bengal have increased rapidly of late both in number and in size, and the mine-owner is now a formidable competitor

with the tea-planter in the districts of labour-supply. He gives higher wages, and the mines have at least the attraction of being nearer the districts of recruitment.

Recruiting agencies

5. Adding to the number of contractors, recruiters, and agents returned by the Superintendent of Emigration, Calcutta, the numbers reported by the local Superintendents, it would appear that there were at work during the year 13 contractors with 10 sub-contractors, 161 licensed recruiters, 24 special local agents who were licensed under the old Act, I of 1882, and continued to work until their licenses expired, and 37 local agents, as compared with 2 contractors, with 16 licensed recruiters, 17 special local agents, and 11 local agents in the preceding year. It may be, however, that individuals were licensed as contractors in more than one area, and that some have therefore been *twice* counted.

The increase in the number of recruiters' licenses is considered by Dr. Forsyth to be indicative of the good effect of the warning given to contractors not to avail themselves of the services of unlicensed recruiters.

The number of garden sardars and sardarnis at work in the recruiting districts fell from 4,045 in 1900 to 3,902 in 1901. During the latter part of the year 17 garden sardars with special permits under Chapter V of the new Act were sent to the Chota Nagpur Division, but they despatched no emigrants before the close of the year.

Classification of emigrants

6. Of the 30,777 emigrants despatched to the labour districts, 11,631, or 34 per cent., as against 40 per cent. in 1900 went as free emigrants; 6 per cent. as against 2 per cent. in 1900 were recruited by the licensed contractors; and 7 per cent. as against 12 per cent. in 1900 by the special local agents; garden sardars recruited 15,041 emigrants, or 48 per cent of the whole number, as compared with 29,493, or 45 per cent., in the previous year. The districts in Bengal outside the Chota Nagpur Division and the Sonthal Parganas contributed only 2,278 of the registered emigrants. The great decrease in the number of "free" emigrants, who numbered 26,300 in 1900, is attributed by the Superintendent of Emigration, Calcutta, to the prohibition of recruiting otherwise than under Chapters III and IV of the Act in the districts of the Chota Nagpur Division, the Sonthal Parganas, and in the Central Provinces, but is no doubt also due to the abolition of registration at Dhubri.

According to the reports of the Superintendents of Emigration, only 5,894 labour contracts were executed during the year, but it is possible that there has been some mistake in the figures furnished, as out of the total number of emigrants despatched to the labour districts, 19,146, including dependants, were registered under the Act. The Superintendent of Emigration, Calcutta, will be asked to explain, in consultation with the other Superintendents, this apparent discrepancy.

Casualties *en route* and sanitary arrangements.

7. Between recruitment and embarkation 255 casualties were ascertained, of which 7 only were deaths, as against 132 deaths in the preceding year. The reduction in the number of casualties on the river journey was very marked, being only 36, or ·11 per cent., as against 227, or ·34 per cent., in 1900. The deaths on the river journey were 26, or ·08 per cent., as against 214, or ·32 per cent., in the previous year.

This result was due to the careful measures adopted for the well-being of the emigrants in transit. Special care was taken by the official who inspected the depôts, places of accommodation, and rest-houses to see that they were kept clean and well ventilated; that the food and water-supply for drinking, culinary, and ablution purposes were good and sufficient; and that the accommodation and latrine arrangements were satisfactory. Vaccination was carefully and efficiently performed. In all the districts the health of the recruits was good, and there was no epidemic among them of any kind either in the depôts or on the river journey.

Measures taken to ensure the registration of emigrants in the district of recruitment.

8. Special measures were taken to ensure the proper working of sections 33 and 34 of Act VI of 1901, which require registration of emigrants in the district of recruitment. On its being reported that persons acting ostensibly

under section 92 of the Act were sending coolies to licensed recruiters in other districts who registered and put them under contract, contractors were warned that their recruiters must communicate direct with emigrants from the first without the intervention of any third party. They are not prohibited from recruiting within the local areas for which they are licensed emigrants residing elsewhere who come to such areas of their own accord, but they are not permitted to employ intermediaries to bring emigrants to them from other local areas. It was pointed out to contractors that if they make use of such assistance, their licenses and those of their recruiters are liable to be cancelled.

In all districts enquiries were made by the registering officers before registration of non-resident emigrants, and in some cases registration was refused. Before registration of single women is allowed, statements of the recruiter and of other emigrants of the party are recorded. Of the 1,907 emigrants registered by contractors, the largest number, viz., 1,347, or 70 per cent., were again registered in the 24-Parganas. In spite of the precautions taken to have registrations effected in the districts of recruitment, only a small proportion of the emigrants registered in the 24-Parganas and at Raniganj were residents of those districts; and the registration of non-resident emigrants at Calcutta, Howrah, and Raniganj still requires careful attention,

Measures adopted for stopping un controlled professional recruiting

9 The Lieutenant-Governor is glad to observe that licenses were granted after careful enquiry by the Superintendents of Emigration. In Manbhum and Singhbhum a list of licensed contractors and recruiters was communicated to each police thana and outpost. The police were also ordered to instruct the village chaukidars at the weekly parades to see that no person without a recruiter's license is permitted to do any recruiting; and the Emigration Officer at Purulia and the Government Railway Police were ordered to watch the trains and other routes so that no free coolies may be despatched by rail or otherwise except in accordance with the rules made under the Act.

In order to check unlicensed recruiting in the Sonthal Parganas, the Commissioner of Bhagalpur has directed that a list of the licensed recruiters be sent to all thanas, parganaits, and other leading persons once in six months, so that it may be known who are licensed to recruit, and that information may be given about unlicensed recruiters.

Several cases of infringement of rules having been reported by the Emigration Officers at Katihar, Goalundo, and Jatrapur in respect of railway coolies, the provisions of the law were pointed out to the Agent, Assam-Bengal Railway, and he was requested to instruct the railway contractors and labour agents to build and maintain properly-equipped rest-houses at the several halting places on the emigration routes.

10. On the whole it may be said that the year was one of transition to a state of more complete supervision and control of recruitment in those districts, viz, the Sonthal Parganas and the districts of Chota Nagpur, in which past experience has shown increased supervision to be necessary in order to prevent abuses of recruiting among simple and ignorant people.

By order of the Lieutenant-Governor of Bengal,

W. C. MACPHERSON,

Offg. Secretary to the Govt. of Bengal.

RESOLUTION ON THE ANNUAL REPORT ON THE REFORMATORY SCHOOLS AT ALIPORE AND HAZARIBAGH FOR THE YEAR 1901.

GENERAL DEPARTMENT—EDUCATION.

Darjeeling, the 16th July 1902

RESOLUTION—No. 1382T.—G.

READ—

The Annual Report on the Reformatory Schools at Alipore and Hazaribagh for the year 1901.

The Annual Report on the Reformatory Schools at Alipore and Hazaribagh has this year been curtailed in accordance with the instructions issued. The Lieutenant-Governor has no objection to the maximum length of the report being fixed at six instead of four pages.

This is the second year of the working of the two Schools under the Education Department.

2. *Admissions.*—It is satisfactory to observe that the number of admissions fell from 128 in 1900 to 120 in 1901, but the number is still large as compared with the admissions in 1898 and 1899. The Boards of Management, as desired in last year's Resolution, examined the admissions for 1900 to ascertain whether any of the boys could not be more suitably dealt with under the provisions for youthful offenders. The result of this examination led to the release of 4 boys from the Hazaribagh School. The Lieutenant Governor requests that the Boards of Management will continue to carefully scrutinise all admissions, and report to Government any cases of boys who, in their opinion, could have been more suitably discharged on probation of good conduct under section 562 of the Criminal Procedure Code or after due admonition under section 31 of the Reformatories Act of 1897. It has been ascertained from the judicial returns for the year that 256 offenders, probably in most cases juvenile, were dealt with during the year under section 562 of the Criminal Procedure Code, and 44 were discharged after admonition or were delivered to parents and guardians under section 31 of Act VIII of 1897. With reference to the Director's remark that the Board of Management of the Alipore School are of opinion that it is not desirable to send boys to a Reformatory on first conviction, or boys below ten years of age, it must be pointed out that the Lieutenant-Governor has decided that no such absolute instructions can properly be issued to the Courts.

3. *Health, Discipline, and Education.*—The health of the boys in both Schools was good, the admissions to hospital in the Hazaribagh School showed a slight increase Punishments were more frequent in the Alipore School than at Hazaribagh, and discipline appears not to be so good in the former School Satisfactory progress has been made in both Schools in elementary education, drill and gymnastics are included in the training, and games are played.

4. *Industries.*—In accordance with the system inaugurated last year of concentrating, as far as possible, boys of agricultural castes at Hazaribagh and those of industrial castes at Alipore, 41 boys were regularly employed at Hazaribagh on cultivation and 21 boys on market-gardening, but at certain seasons of the year nearly all the boys were employed on agricultural work These arrangements are in accordance with the Lieutenant-Governor's orders, but there has been great delay in giving effect to them in the Hazaribagh School. In the Resolution of 13th September the teaching of market-gardening was enjoined. A cultivator to teach market-gardening was not got till June 1901, and then was badly selected and was a failure. Government has not been able to approve the proposal of the Hazaribagh Board of Management to engage a gardener from Saharanpore. The object is not to teach the boys floriculture and horticulture, but to make them expert market-gardeners, and for this purpose a good market-gardener of the Koeri caste from the neighbourhood or from Bankipore is to be preferred to a Saharanpore gardener.

There was a considerable decrease at both Schools in the profits from manufactures. This was fully anticipated in the orders passed on the reports

for 1899 and 1900, when it was directed that industries should be taught to the boys, preferably the trades of their castes which would be useful to them in after life. Local conditions may vary, however, and it is the duty of the Boards of Management to look out for openings for the boys. It was stated in last year's Resolution that the Lieutenant-Governor took no exception to the diminution of profits from industries. He desires to say again emphatically that such a diminution of profits should not be weighed against the reform which he has enjoined; and he regrets to notice that the Board of Management and the Superintendent at Alipore did nothing during the year to carry out a reform which he has had much at heart. Seventy-two boys were taught carpentry at Alipore in 1901, against 60 in 1900; 19 were taught tinsmithing, against 8, and 48 were taught book-binding, against 40. It is certain that there was no such increase in the number of lads, who are carpenters and book-binders by caste, and that boys of those castes did not reach anything like the numbers taught these trades. Were these boys taught the trades that would be likely to be useful to them when they left the School? From page 4 of the report it appears that out of 125 boys released from Alipore in the years 1898 to 1900, only 13 are now following the trades taught to them in the School. The figures above cited for the year under review show that this ill-success is likely to be aggravated, and the Lieutenant-Governor again calls the very special attention of the Director and of the Board of Management to the subject.

5. *Licensing.*—In last year's report it was stated that the Board of Management, Alipore, had taken no action in the important matter of licensing boys out. The Lieutenant-Governor is therefore pleased to learn that during the year under review 5 boys from the Alipore School were licensed out for work in the Upper Hooghly Mills, and that there is a probability of the system being extended. It is not stated whether these boys were wanted for carpentry or for weaving, and the presence of this opening for employment accentuates the apparent absence of any arrangement to prepare lads for it. The Lieutenant-Governor is gratified to learn that during the year under review 34 boys as against 12 last year were licensed out from the Hazaribagh School, and he congratulates the Board on the intelligence and care with which they have ordered the arrangements of the School. When, as apparently at Hazaribagh, an exhaustless field is opened out for employment in mining, carpentry, and blacksmith's work, it is quite a matter for the Board's consideration, if they are satisfied as to the stability of the opening, to prepare more directly for it. It is true that this would be a divergence from the plan, by which the Hazaribagh School was to be a school for agriculture. But the whole object of the Schools is to fit the lads to earn an honest livelihood, and if local conditions give a really valuable opening to that end in other directions, the Lieutenant-Governor has no objection whatever to deviation from the general plan to utilize it. He trusts that the licensing system will become more popular. No corresponding advantage is to be gained by resort to the ancient apprenticing system of 1850. By the apprentice system no wage, but only board, lodging, clothing, and instruction is secured for the boy. It is the direct aim of the School that the boy should go out instructed.

6. *Training of Boys.*—The efforts of the Educational Department to follow up the history of every boy for three years after his release were more successful during the year under review than in the previous year. The percentage of failure to trace out the boys after their release to the total number discharged in 1900 was 24 per cent as against 34 and 33 per cent. in the years 1899 and 1898. The results are not, however, as satisfactory as the Lieutenant-Governor had hoped for. With an agency like the Educational Department, which commands the sympathy of the people at large, there should be no excuse for failure to trace out and account for nearly the whole number of boys released. The Lieutenant-Governor trusts that the procedure now adopted of releasing boys in the presence of an Educational officer may lead to better results, but success depends on the personal zeal and interest taken in the matter by the Educational officer himself.

WORKING OF THE FIRE BRIGADE IN THE TOWN AND SUBURBS OF CALCUTTA AND IN THE MUNICIPALITY OF HOWRAH DURING THE YEAR 1901-1902.

NOTIFICATION—No 1454T.—M.

The 18th July 1902.—The following is published for general information.

E. W. COLLIN,
Offg. Secy. to the Govt. of Bengal.

No. 8034, dated Calcutta, the 25th June 1902.

From—R A. D'O. BIGNELL, ESQ, Commissioner of Police, Calcutta,
To—The Secretary to the Government of Bengal, Municipal Department.

I HAVE the honour to submit, in accordance with section 41, Act I of 1893, the following report on the working of the Fire Brigade in the Town and Suburbs of Calcutta and in Howrah during the year 1901-1902.

2 The force at the close of the year under review was as follows —

Lall Bazar	*Howrah*	*Bhowanipore.*
1 Superintendent	1 Engineer	2 Tindals
1 Chief Engineer	1 Native Driver.	12 Khalasis
2 Assistant Engineers	5 Tindals	14

Hose Carts with 400 feet of hose are also kept at the Sukea's Street, Fenwick Bazar, Jora Bagan, Coomertolly and Alipore Police Stations for emergencies.

A statement showing the receipts and expenditure of the Fire Brigade is annexed to this report. The year opened with a balance of Rs. 19,750-3-11, the receipts amounted to Rs. 85,951-5-3 The total expenditure during the year amounted to Rs. 87,755-9-3, leaving a balance of Rs. 17,945-15-11 at the close of the year.

The increase of expenditure under the head "Establishment" is due to the pay of the khallasis being raised from Rs. 7 to Rs. 8 under Government orders.

The savings under the head of contingencies is principally due to the fact that Rs. 2,300 worth of coal and clothing ordered during the year was undelivered, and therefore not paid for. There was also a saving of Rs. 900 from the sum budgeted for the purchase of hose, and Rs. 650 for the purchase of horses and Rs. 802 for the repair of the Howrah Fire Station, the total savings being Rs. 5,324-12-8.

Rupees 1,500 due to the Calcutta and Rs. 50 to the Manicktollah Municipalities for cost of collection, remained undisbursed at the close of the year, the total decrease under the head of "Other charges" being Rs. 1,663-14-2.

The receipts under the heads of "Hire of Fire Engine," "sale-proceeds of unserviceable hose" and "of horses" considerably improved, and these, together with the decrease already noted, are responsible for the large closing balance.

3. The following table gives the number of fires and the way they were dealt with :—

Description of fire	Number of fires	Number of fires attended by Fire Brigade	Number of fires extinguished by residents	Number of fires attended by Port Fire Engine	REMARKS
1	2	3	4	5	6
Fires at which property destroyed valued at Rs 50 or more	42	27	12	*3	* Fire Brigade also attended at these fires
Fires at which property destroyed valued at less than Rs 50	82	16	64	†2	† Steam Engine "Damooda" attended in one case

4. Ten of these fires occurred in buildings licensed under Act I (B.C.) of 1893 and Act I of 1894, in which property to the total value of Rs. 6,37,400 was destroyed.

5. The total estimated value of property destroyed by fire was Rs. 9,17,632-8 against Rs 8,80,265-10, the value of the property destroyed in 1900-1901.

6. No lives lost during the year at fires, but two of the European crew of the S. S. "Forth" that caught fire at the Hooghly Docks, Howrah, were severely burnt and had to be removed to hospital, where they recovered.

7. The following were the most serious fires :—

(a) On the 3rd December 1901, a masonry building at Ghoosary, Howrah, containing cotton and machinery caught fire and burnt for seven hours and forty minutes. Estimated loss Rs. 80,000.

(b) On the 22nd December 1901, five jute godowns containing jute caught fire at Sulkea, Howrah, and burnt for seven hours. Estimated loss Rs. 1,00,000.

(c) On the 7th January 1902, a fire broke out at Watson's Patent Hydraulic Jute Press at Bag Bazar and lasted for two days and a half. Estimated loss Rs. 3,95,000.

(d) On the 21st February 1902, the contents of masonry jute godowns in Chitpore caught fire and burnt for five hours and forty-five minutes. Estimated loss Rs. 9,300.

(e) On the 24th February 1902, the S. S. "City of Bombay" laden with jute, cotton, gunny and rice, caught fire in the Kidderpore Docks; the fire lasted for 7 hours and 15 minutes Loss estimated at Rs. 1,05,000.

(f) On March 5th, 1902, a masonry jute godown on Dhurmahatta Street caught fire. Loss estimated at Rs. 1,500. Fire lasted for five and a half hours.

(g) On the 7th March 1902, the flat "Debong" laden with jute caught fire in the Kidderpore Docks. The fire lasted for twenty-three hours Estimated loss Rs. 1,40,000.

(h) On the 27th March 1902, a masonry godown containing jute caught fire at Shibpore, Howrah, and burnt for thirteen hours and forty-five minutes. Estimated loss Rs. 50,000.

8. Four licenses were granted under section 36, Act I of 1893 for letting off fire-works, rockets, &c. None of the licenses were suspended under Section 37 of the Act.

9. Two prosecutions were instituted under Act IV of 1881 for manufacturing fireworks without licenses in both cases the accused were convicted and fined.

The mean pressure, temperature, etc., are deduced from the traces of the Barograph and Thermograph, and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph

The mouth of the rain-gauge is one foot above the ground

o, overcast; g, gloomy; d, drizzling rain; p, passing temporary showers, t, thunder; l, lightning.

The 29th July 1902.—The following draft rule which it is proposed to make under section 189 of the Bengal Tenancy Act, VIII of 1885, as amended by the Bengal Tenancy (Amendment) Act, III of 1898, and to be substituted for clause (*c*), rule 4, Chapter VI of the Rules, published under Notification No. 111(L.R.), dated the 10th January, 1899, at pages 33-42, Part I of the *Calcutta Gazette* of the 11th idem, is hereby published for general information under the provisions of section 190 (1) of the said Act.

Any objection or suggestion which any person may desire to make with respect to the draft should be submitted to the Secretary to the Government of Bengal in the Revenue Department, Calcutta, before the 30th August 1902, on which date the draft will be taken into consideration.

Draft rule.

"When there is a considerable difference between the boundary according to the revenue survey map and the existing boundary of the village as ascertained by the Revenue Officer, that officer should ascertain if the existing village has been correctly demarcated He is to bear in mind that, for the purpose of ascertaining the existence of occupancy rights, saving in the case of *char* and *deara* lands to which the provisions of section 180 of the Bengal Tenancy Act apply, the boundary of the village as laid down in the revenue survey map is operative, not that which he may find to be at present adopted. The existing boundary should be followed for the purposes of map and record, but the boundary of the revenue survey shall also be indicated on the new village map"

NOTIFICATION.

JUDICIAL.

Simla, the 24th July 1902.

No. 1123.—In exercise of the power conferred by section 8 of the Administrators-General and Official Trustees Act, 1902 (V of 1902), the Governor-General in Council is pleased to direct that, where a subject of His Majesty the Emperor of Japan dies in British India, and it appears that there is no one in British India, other than the Administrator-General, entitled to apply to a Court of competent jurisdiction for letters of administration of the estate of the deceased, letters of administration shall, on the application to such Court of any Consular officer of His Majesty the said Emperor, be granted to such officer on such terms and conditions as the Court may, subject to the following rules, think fit to impose, namely:—

I.—Where the deceased has left any heir or universal legatee of his own nationality only, or any heir or universal legatee qualified to enjoy the civil status of the deceased, any such Consular officer shall, on giving notice to the authority (if any) in possession of the property of the deceased, take possession and have custody of such property and shall pay the expenses of the funeral, retaining the surplus for the payment of his debts and for the benefit of the heir or universal legatee to whom it may rightly belong:

Provided, first, that such Consular officer shall immediately apply to a Court of competent jurisdiction for letters of administration, and such letters shall be delivered to him with such limitations and for such time as such Court may deem reasonable:

Provided also that where there is no such Consular officer in the locality where the decease has occurred, the authority duly empowered by law shall proceed in these acts until such a Consular officer arrives.

II.—Where the deceased has left in British India any heir or universal legatee of other nationality than his own, or any heir or universal legatee to whom the civil status of the deceased cannot be granted, the Government may determine whether the Court of competent jurisdiction shall proceed according to law, or shall confide the collection and administration, under the proper limitations, to any such Consular officer.

Stort reef—Its position—Marion reef—Its non-existence.

THE British Admiralty has given notice (No. 392 of 1902) that a recent survey shows the position of the Stort reef to be as follows —

(a) Stort reef, on which there is a depth of 3½ fathoms, is about three-quarters of a mile long N by E. and S. by W. Its south-eastern part is situated with Pulo Pie bearing N. 69° E., distant 6½ miles, and Pulo Bando, N. 1° W, or about 3 cables south of the position shown on the Chart The south-eastern side of the reef is steep-to.

Approximate position, lat. 0° 54½′ S., long. 99° 59½′ E.

(b) A sounding of 50 fathoms, no bottom, was obtained in the reported position of Marion reef under conditions so favourable that the discoloration of the water over Stort reef, distant 1¾ miles to the westward, could clearly be traced, no sign however of the Marion reef could be seen, and it is assumed that the vessel reporting it saw the Stort reef This reef has therefore been expunged from the Chart.

Approximate position, lat. 0° 54′ S, long 100° 1½′ E.

DECLARATION OF STATE HOLIDAYS

FINANCIAL DEPARTMENT—MISCELLANEOUS

Calcutta, the 28th July 1902

RESOLUTION—No. 3439Mis

READ—

The Resolution of this Government, No. 1624T.—F., dated 31st October 1901, on the subject of the holidays given in Government offices and the practice regarding their enjoyment by clerks and other servants of Government.

Read also—

A letter from the Government of India in the Home Department, No 1799, dated 12th June 1902.

IN paragraph 4 of the Resolution above cited, it was remarked that, under the orders of the Government of India, the State holidays declared by the Local Government by notification under section 25 of the Negotiable Instruments Act to be public holidays would be in future ordinarily confined to the 24th May, the birthday of Her late Majesty, and the 9th November, the birthday of His Majesty the King-Emperor, and that these days would be declared by notification in the *Calcutta Gazette* to be public holidays.

2. In their letter of the 12th June 1902, the Government of India direct, in modification of those orders, that in future years a State holiday shall be notified under the Negotiable Instruments Act on May 30th or such other date as may be appointed for the celebration of the King's birthday in India, and that no holiday shall be declared on May 24th or November 9th in future.

ORDER.—Ordered that a copy of these orders be forwarded to all Heads of Departments, Commissioners and District Magistrates (through Commissioners), and to the several Departments of the Secretariat for information and guidance.

Ordered, also, that the Resolution be published in the *Calcutta Gazette*.

By order of the Lieutenant-Governor of Bengal,

E. W. COLLIN,

Offg. Secretary to the Govt. of Bengal.
